Introduction

The Consumer Price Index (CPI) measures the average change in the price paid by consumers for a fixed market basket of goods and services. It is usually based on household expenditure weights of the goods and services in the basket and their current market prices. The twelve CPI's (i.e., the CPI's of the 11 Regions and the CPI at Country Level) presented in this report are based on the results of the Household Income, Consumption and Expenditure Survey (HICES) conducted by the Central Statistical Agency in 2015/2016 from which expenditure weights are derived for major household goods and services of that period and adjusted using the December 2016 retail prices of the goods and services as a base period.

The December 2016 based CPI updates the previous CPI series (i.e. December 2011 based) and the newly selected baskets are more diversified and the weights are more accurate. It also showed various improvements and incorporates non-food index as an independent group. The new series is constructed for country as a whole and Regional States including Dire Dawa and the Addis Ababa City Administration. However, similar indices had been utilized at Addis Ababa Level since 1963 and at Country, Urban and Rural Levels since 1995/96 and in Country and Regional level since 2000.

All the twelve general indices are divided into two major groups that is food and non-food index. The non-food index has eleven major divisions each, namely: Alcoholic Beverages; Cigarettes and Tobacco; Clothing and Footwear; House Rent, Construction Materials, Water, and Fuel and Power; Furniture, Furnishing, Household Equipment and Operation; Health; Transport; Communication; Recreation, Culture; Education; Restaurants and Hotels; and Miscellaneous Goods and Services. On the other hand, the Food Index has 10 classes. These are: Bread and Cereals; Meat; Fish and Seafood; Milk, Cheese and Eggs; Oil and Fats; Fruits; Vegetables and Pulses, Sugar, Honey and Chocolate; Food Products n.e.c., and Non-alcoholic beverages.

For the construction of the current consumer price indices, up to date data on retail prices are collected in the purposely from selected sample market places located in representative urban centers in each zone/special weredas of the country. Hence, a

total of 119 market places were selected for the retail price survey. In each market place an enumerator is assigned to undertake the data collection activities every month. The price data is collected from the 1st day through 15th days of European Calendar month under consideration. To calculate the monthly regional consumer price indices, geometric means of prices of the specific regions are used. The distribution of the market place of each region and items included in the basket of commodities are given on Table A on page 3. An important factor in constructing a Consumer Price Index is to select the representative basket of goods and services. Including all consumption items into the market basket of goods and services is both cumbersome and unnecessarily costly in term of data collection and processing. Furthermore, it doesn't make sense to include an insignificant weight into an index basket which could not move the price relative up or downwards compared to the general market trend. As a result, basket of goods and services included in the regional baskets are determined by expenditure cut-off point.

Country level CPI aggregates the regional group indices. The contributions of the six relatively big regions in terms of the magnitude of the expenditure account for more than 95 percent, namely, these regions are Oromia, Amhara, SNNP, Addis Ababa, Somali and Tigray. On the other hand, the contributions of the remaining regions to the Country Level Consumer Price Index is about five percent.

According to the weights for food and non-food groups in Table B below, the December 2016 based CPI is about 54 percent of household expenditure spent on the food component, which increased by 1 percentage points as compared to the December 2006 based CPI. On the other hand, the expenditure on non-food components decreased from 47 percent to 46 percent. The reason for ± 1 percentage point change was that the share of food increased in the two geographically and economically big regions of Oromia and Southern Peoples region.

The 2011 and 2016 CPI adapted the full version of the latest Classification of Individual Consumption by Purpose (COICOP) while the 2006 based CPI was an earlier version of COICOP. The following table shows the different CIOICOP versions by Comparison. In the 2006 based CPI Recreation, Entertainment and Education; and

Transport and Communication were put in the same divisions while the 2011 and 2016 based CPI separated them as standalone divisions. A new division called Restaurants and Hotels was introduced in the 2011 and 2016 based CPI by moving the food taken away from home previously categorized with Food to this new division. Non-Alcoholic beverages were taken out of the Non-Food division and moved to the Food division.

September 2021 Country Level Inflation Rate

12 months Moving Average Inflation at Country Level

As it is indicated in Table 'C' below the country level overall inflation rate (annual change based on 12 months Moving Average) rose by 23.0 percent in September 2021 as compared to the one observed in a similar period a year ago. The country level food inflation increased by 27.2 percent as compared to the one observed a year ago. The country level Non-food inflation rate increased by 17.6 percent in September 2021 as compared to the one observed in September 2020. The 12 months moving average inflation rate shows the longer term inflationary situation.

a) Inflation based on comparison of Current vs. Last year's similar month at Country Level (Year-on-Year Change)

Inflation based on comparison of Current vs. Last year's similar month shows the current inflation situation. Table (D) shows Inflation rate based on last year's similar month comparison. As can be seen from the table the September 2021 General year-on-year inflation has increased by 34.8 percent as compared to the one observed in September 2020. The year-on-year Food inflation has increased by 42.0 percent in September 2021 as compared to the one observed in September 2020. Specially, Bread and Cereal prices continued to strongly increase in the current month such as **Rice**, Injera, Bread, Teff, Wheat, Sorghum, Maize, Barely, Wheat flour, Spaghetti and Macaroni showed rapid increase in their prices. In addition, the continued increase in the prices of Meat, cooking Oil (Imported cooking oil prices are more than doubled as compared to similar month last year), Milk, Cheese and Eggs, **Butter, Spices (mainly salt and Pepper)** and **coffee beans** during the current month has contributed to an increase in the rate of inflation. The annual inflation rate showed an increase in the current month since prices were relatively lower in the same month last year. The Non-Food inflation showed an increase of 25.2 percent in September 2021 as compared to the one observed in September 2020. The rise in Non-food Inflation in the mainly due to rise in the prices of Alcohol and Tobacco, Stimulants (Chat), Clothing and Footwear, Housing Repair and Maintenance (House rent, Cement and Corrugated Iron sheets), and Energy (Firewood and Charcoal), Furniture and home furnishings, Medical care and Jewelry (Gold).

Inflation based on comparison of Current vs. Last month at Country Level (month-on-month)

The month-on-month General CPI for September 2021 has showed an increase of 4.0 Percent as compared to the preceding month. The monthly inflation rate measures the price change between the two latest months. Although up to date, it can be affected by seasonal and other short term effects.
