F O R E W O R D

Statistical data that reflect the socio-economic and demographic conditions of the residents of a country are useful for designing and preparation of development plans and for monitoring and evaluation of the impact of the implementation of the development plans. These statistical data include population size, age, sex, fertility, mortality, migration, literacy and education, marital status, occupation, industry, housing stocks and conditions, ...etc. In order to fill the gap for these Socio-economic and demographic data need, Ethiopia conducted its second National Population and Housing Census in October, 1994.

The 1994 Population and Housing Census of Ethiopia was conducted under the auspices of the Population and Housing Census Commission that was set up under Proclamation No. 32/1992. The Commission was chaired by the Prime Minister and the members of the commission were drawn from various relevant ministries. The Central Statistical Authority served as the Office of the Commission (Secretariat). Hence the processing, evaluation and analyses of the data collected in this census as well as its dissemination are the responsibilities of this office. As stated above the census was conducted in October 1994 and the resulting data are processed and evaluated. Volume I of the census report presents the Statistical Reports for Amhara Region which appear in four separate parts:

Volume I: Part I - Statistical Report on Population size and Characteristics.

Volume I: Part II - Statistical Report on Education and Economic Activity.

Volume I: Part III - Statistical Report on Migration, Fertility and Mortality.

Volume I: Part IV - Statistical Report on Housing Characteristics.

Thus, the Office of the Population and Housing Census Commission is pleased to present the census report "The 1994 Population and Housing Census of Ethiopia: Results for Amhara

Region, Volume I Part I - Statistical Report on Population Size and Characteristics" for users. Another report which deals with the detailed analysis of the results of the 1994 Population and Housing Census data for Amhara Region will also be produced soon.

The 1994 Population and Housing Census was a huge nation wide operation which could not be undertaken by a single organization. Thus, full cooperation and assistance of government and non- government organizations, external donor agencies and the public in general was obtained. A number of preparatory activities were also carried-out before the census enumeration was begun. Among the major census preparatory activities was the conduct of the Population and Housing Census Map Work. In the census map work the peasant associations in rural areas and the urban dwellers associations in urban areas were sub-divided into enumeration areas with 150-200 housing units in urban areas and 150-200 households in rural areas. About 5-6 contiguous enumeration areas were formed into one supervision area. In this exercise enumeration area and supervision area maps were also prepared. In the census map work operation a total of 49,978 enumeration areas and 9,845 supervision areas were constructed in the settled rural areas and 8,724 enumeration areas and 1,575 supervision areas in the urban areas of the country. In Amhara Region a total of 15057 enumeration areas and 2964 supervision areas were delineated in the rural areas, and 1615 enumeration areas and 294 supervision areas in the urban areas.

During the census enumeration, one enumerator was given the map of one enumeration area and was responsible to record all persons and housing units in that enumeration area. One supervisor was later assigned to a supervision area and was responsible for the quality of the information collected in that area.

The Office of the Population and Housing Census Commission would like to thank all government and non-government agencies who participated in the organization of the census, the supervision of the field work, the data collection, and the respondents who participated in providing the necessary

information. The government of Ethiopia has given huge financial and unreserved administrative support in undertaking the 1994 National Population and Housing Census from its inception till the dissemination of the results. This indicates the commitment and high priority offered by the government for socio-economic and demographic data collection, processing, evaluation and dissemination of the results to users.

The Office would also like to take this opportunity to express its many thanks to the United Nations Population Fund (UNFPA) to its generous financial assistance and technical support in conducting the census. Moreover, thanks are due to United States Agency for International Development (USAID) for its financial and technical assistance for the census. Further thanks are due to the United Nations Development Program (UNDP) and to the Swedish International Development Authority (SIDA) for their financial assistance. The office hopes that the data presented in this report will be found useful by all data users.

Abdulahi Hasen(Ph.D.)

Member
and
Secretary,
Central Census Commission

CHAPTER I

INTRODUCTION

This chapter presents an over view of the content of the census report " The 1994 Population and Housing Census of Ethiopia: Results for Amhara Region, Volume I: Part I- Statistical Report on Population Size and Characteristics". This report presents information on Population size of zones, weredas, towns and kebeles. It also presents the sex, age, ethnic, language, religion, marital status, disability, ...etc. conditions of the population of the region. Projections of population sizes up to the year 2000 are also presented in this report. The data presented in this report constitute some of the major statistical tables that are essential to planners, administrators, researchers and other data users. The analytical report of the results of the census for Amhara Region will be presented in a separate report, and will deal with indepth analyses of the results. Other reports that also present information for Amhara Region are: Volume I: Part II- Statistical Report on Education and Economic Activity; Volume I: Part III- Statistical Report on Migration, Fertility and Mortality; and Volume I: Part IV - Statistical Report on Housing Characteristics.

Amhara Region consists of ten zones and one special zone i.e. Bahir Dar; 106 weredas, and 208 towns. The rural part of the region has 4,980 farmers association areas, while the urban part has 337 kebeles in the 208 towns. Localities were identified as towns or rural areas during the census cartographic work. Towns were defined as localities in which Urban Kebele Administration (previously known as Urban Dwellers Association) has been established. Localities that had 1000 or more persons whose inhabitants were primarily engaged in non agricultural activities were identified as towns irrespective of whether Urban Kebele Administration has been established or not. Similarly capitals of weredas were also identified as towns even if Urban Kebele Administration has not been established. However, changes of wereda boundaries have occurred since the conduct of the

cartographic work; and in some instances two or more previous weredas have been combined to form one new wereda. Thus, localities that were seats of wereda administration at the time of the cartographic work, and subsequently identified as towns in the census report, may no longer be wereda capitals.

The 1994 Population and Housing Census was the second national population and housing census ever to be conducted in the country. The first population and housing census. The Second Population and Housing Census of Ethiopia was conducted beginning 11 October, 1994 and was completed in most areas within the following ten days. Eleventh of October, 1994 was used as the census day. The questionnaires used for the census were prepared in Amharic. English translations of the questionnaires used in the census are presented at the end of the report. The types of questionnaires used were:

i) Short Questionnaire (Appendix I)
ii) Long Urban Questionnaire (Appendix II)
iii) Long Rural Questionnaire (Appendix III)

The content of the short questionnaire was similar in urban and rural areas. The questionnaires were filled-in by enumerators who went from one household to the next. All members of the household were recorded on the same questionnaire. The short and the long questionnaires differed on the number of variables collected. The short questionnaire collected basic data on population such as population sizes, sex, age, language, ethnic group, religion, and marital status. In addition to these, the long questionnaire included data on disability, education, economic activity, migration, fertility, mortality, and housing stocks and conditions.

The type of questionnaire administered to each household was determined by using a systematic sampling selection procedure. During the three days before the census day all households, and housing units were listed in a separate form designed for the purpose. This list was used to identify the type of questionnaire that was to be administered to the households. One out of five

households was selected to be interviewed using the long questionnaire, while the other four were interviewed using the short questionnaire. Residents of hotels, hostels and other collective quarters were always interviewed using the long questionnaire. Short questionnaire was also administered on the homeless persons.

Some of the information collected for the region which refers to population sizes, sex and age composition, language, ethnic, religious and marital distributions was collected from all persons covered in the census. However, some other information was collected from only a sample of the population. This refers to disability, education, economic activity, migration, fertility, mortality, and housing stocks and conditions. Even though the above information was collected from a sample of the population, statistical weights were applied to the information collected in order to let them represent the entire population. This means that the numbers presented in the tables that refer to disability, education, economic activity,... etc. represent the entire population of Amhara Region and not only the sample population.

The fact that the information was collected from a sample of households and not from the entire households does not make the information less reliable. In fact this process increases the quality of the information collected by reducing the work load that would have been faced if all households were covered using the long questionnaires. The reduction of the work load improves the quality of the data because it is expected to facilitate a closer supervision during field work, enable better data coding and editing, and enable the timely processing of the data collected. The census was conducted by enumerators who went from house to house filling in the questionnaires designed for the purpose. Homeless persons were enumerated in the place where they were spending the night.

This report contains two chapters. The first chapter serves as an introduction to the report. Chapter II presents the population sizes, sex, age, language, ethnic, religious, and

marital status distributions of the population. It also provides the disability condition in Amhara Region. Annex I presents population projection up to the year 2000, and Annex II presents population size of kebeles. Annex III presents the list of tables that appear on other parts of Volume I. The accompanying Volume I: Part II consists of Chapter III. Which presents the Educational Characteristics of the Population and Chapter IV which deals with the Economic Characteristics of the population in the region. Volume I: Part III presents Chapter V which deals with Migration, Fertility and Mortality conditions. Another report entitled volume I: Part IV presents Chapter VI which deals with the Housing Characteristics in the Amhara Region.

Because of the use of sampling in the collection of some of the information in the census, slight discrepancies between the various tables may be observed. Tables that deal with population size, sex, age, language, ethnic group, religion and marital status refer to the entire population. Tables that deal with disability, education, economic activity, migration, fertility, and mortality exclude the homeless. Since the homeless population is very small compared to the population of the Amhara Region, the discrepancies are very small. Homeless persons were enumerated using only the short questionnaire because the enumeration took place at night at the place where they were sleeping, and it was not convenient to apply long questionnaires in these situations. The Homeless were not included in the application of the statistical weights.

The tables presented here were selected from a long list of tables that have already been produced for the Amhara Region. The forthcoming analytical report for the 1994 Population and Housing Census data of the Amhara Region will also present some of these tables. The analytical report will concentrate more on providing indepth analysis rather than providing detailed tabulations. Analysis of the results of the census are expected to continue even after the production of the analytical report.

CHAPTER II

POPULATION SIZE AND CHARACTERISTICS

This chapter presents data on population size for Amhara Region at zone, wereda, urban kebeles and rural farmers' associations levels classified into rural and urban areas. Also presented are population sizes by age, sex, type of residence, household size, ethnic group, language, religion, relationship to head of the household, marital status and disability. The chapter consists of various tables which are self-explanatory. However, short definitions of some important terms and concepts used in the chapter are provided.

The first table of this chapter (Table 2.1) presents population size of Amhara Region by sex classified into urban and rural areas. Population size of towns is provided in Table 2.2. According to the 1994 Census, Amhara Region's population was found to be 13,834,297 of which 6,947,546 were males and 6,886,751 were females. The population sizes refer to the de jure population size of Amhara Region as of 11 October, 1994. De jure population comprises of all the people who "belong" to a given area at a given time by virtue of usual residence (Shryock et al., 1973). In the census a person is said to be a usual resident of a household (and hence an area) if he/she has been residing in the area continuously for at least six months before the census day or intends to reside in the area for six months or longer. Thus, visitors are not included with the usual population. Homeless persons were enumerated in the place where they were spending the night. The 1994 Census includes foreign nationals who were residing in the region. On the other hand all Ethiopians living abroad were not counted.

Tables 2.3A - 2.3C classify population size by broad age group and type of residence and Table 2.4 shows population size of zones by sex and type of residence. Type of residence is categorized into two major groups, namely, conventional and non-conventional. Respondents who live in the same housing unit and have common cooking arrangements (eat their food together) are

said to be residing in conventional households. The non-conventional population in turn is sub-divided into residents of collective quarters (hotel/hostel and other collective quarters) and the homeless. A collective quarter is a housing unit, a building, or a compound in which a number of unrelated persons reside together and share common facilities e.g. boarding schools, prisons, hotels, hostels,... etc. Homeless persons refer to individuals without any fixed residence.

The distribution of the number of members per household for the population living in conventional households of zones is given in Table 2.5. A household often consists of the head, the spouse, their children and some other persons residing in the household. A person is considered to be a member of a household if he has the same cooking arrangement with the other members.

The population size of Amhara Region by single years of age and sex is presented in Table 2.6, while Table 2.7 and 2.8, respectively, provide the five year age group and sex distribution of the population for weredas and towns. During the census, age of respondents was registered in completed years. Enumerators used several probing questions to get exact ages from respondents who did not know their exact ages.

Ethnic identity of a person is traced through his/her national or tribal origin. To assist the enumerators in recording the information, detailed list of the ethnic groups in the country, obtained from The Institute of Nationalities Study, was provided in the census enumerators' manual. In this report ethnic groups are listed down in alphabetical order, except where indentation is used to present related ethnic groups next to one another. For example the Kembata, Alaba and Kebena are related ethnic groups. For this reason all these ethnic groups are presented next to one another. To indicate that these are related ethnic groups, the names Alaba and Kebena appear indented in the list below the name Kembata. The selection regarding which ethnic group will appear indented in the table does not imply that one ethnic group is dominant over the others. All the ethnic groups are treated independently and separate figures are presented for each.

The size of each ethnic group residing in Amhara Region and its zones is presented in detail in Table 2.9. The ethnic group distribution of weredas and towns are provided in Table 2.10 and 2.11, respectively. However in Tables 2.10 and 2.11 only the five major ethnic groups within a wereda/town are presented separately, while the rest are grouped together and presented as "others". This was done to keep the table to a manageable size.

In the 1994 Census mother tongue is defined as the language used by the child for communication with his family members or guardians during childhood. Whereas second language is additional language used by the respondent. If the respondent uses more than one additional language, the one that is used more frequently is recorded. Similar to the previous table, indentation is used to present related language groups one after another. Table 2.12 presents the detail distribution of all mother tongues spoken in the region. In Tables 2.13 and 2.14, however, only the largest five mother tongues spoken in weredas and towns respectively are presented. The remaining mother tongues spoken are grouped together and labaled as others. Table 2.15 provides all the second languages spoken in Amhara Region.

Religion is presented under four major groups; namely, Christian, Muslim, Others and Traditional. Christian is further sub divided into Orthodox, Protestant and Catholic. Orthodox Christianity includes the Kibat and Tsega while Seven Day Adventist, Pentecost, Lutheran, Baptist, Anglican, Presbyterian, Meserete Kirstos, Mulu Wengel, Kale Hiywot...etc. are presented as Protestants. Hindus, Jews, Behais, Johovas, Atheists,...etc. fall under the "others" category. Tables 2.16A - 2.16C present the religious distribution of the population by age group, while Table 2.17 and 2.18 show religious groups and their respective size of population for weredas and towns, respectively.

The 1994 census has also collected information on members of the household and their relationship to the head. The head of the household is any member of the household who is recognized

as a head by the members. In a polygamous marriage where the wives have separate households, the husband is considered to be the head of the household of the first wife. The other wives or other members (eg. elder son) is considered to be the head of their respective households. The data on relationship to the heads of conventional households is presented in Tables 2.19A - 2.19C.

Marital status of the population aged ten years and over by age group and sex is presented in Table 2.20A - 2.20C. Marital status is presented in four major groups; namely, single, married, divorced, and widowed. A person who had never been married is considered to be single; married persons include couples who are living together bonded by any kind of marital engagement at the time of the census (Traditional, Church, or Municipality); separated couples are also considered to be married unless they had dissolved their marriage agreement. Any body who had been married but whose marriage was dissolved before the census day is categorized as divorced. A person who has not married again after the death of a spouse is categorized as widowed.

Table 2.21 present disability status and type of disability by broad age groups and sex for the region. Table 2.22 provides disability status and type of disability by sex for each zone. Note that figures in these tables exclude the homeless. In the census a disabled person was defined as one who, due to physical or mental injuries, could not fully perform activities that other healthy persons could do. This represents decrease or loss of ability to discharge various social or economic functions. Disability is presented under ten major groups, namely; i) totally blind ii) partially blind (one whose eyes could only see partially or one who is blind on one eye); iii) hearing problems (totally deaf or partially deaf); iv) hearing and speaking problems; v) leg problems (lame, amputated or crippled); vi) hand/arm problems; vii) leprosy; viii) mental problems (epilepsy, madness, mental retardation, melancholia...etc); ix) other types of disability (different from what is specified above); and x)

multiple disability (with two or more physical defects mentioned above).

At the end of this chapter, projected population size of Amhara region is presented in Annex I. In addition, the population size of urban kebeles and farmers' association are given in Annex II.

TABLE 2.1 TOTAL POPULATION SIZE OF ZONES AND WEREDAS BY SEX, URBAN AND RURAL: 1994

ANNEX III - LIST OF TABLES ON OTHER PARTS OF VOLUME I

VOLUME I: PART II

CHAPTER III - EDUCATIONAL CHARACTERISTICS

TABLE 3.1A Population aged five years and over by status of school attendance, age and sex (Amhara Region-total): 1994

TABLE 3.1B Population aged five years and over by status of school attendance, age and sex (Amhara Region-urban): 1994

TABLE 3.1C Population aged five years and over by status of school attendance, age and sex (Amhara Region-rural): 1994

TABLE 3.2 Population of zones aged five years and over by status of school attendance, sex, urban and rural: 1994

TABLE 3.3A Population aged five years and over currently attending school by level, age and sex (Amhara Region-total): 1994

TABLE 3.3B Population aged five years and over currently attending school by level, age and sex (Amhara Region-urban): 1994

TABLE 3.3C Population aged five years and over currently attending school by level, age and sex (Amhara Region-rural): 1994

TABLE 3.4 Population of zones aged five years and over currently attending school by level, sex, urban and rural: 1994

TABLE 3.5 Gross and net enrolment ratios in primary, junior and senior secondary school for weredas: 1994

TABLE 3.6A Population aged ten years and over by literacy status, highest grade completed and sex (Amhara Region-total): 1994

TABLE 3.6B Population aged ten years and over by literacy status, highest grade completed and sex (Amhara Region-urban): 1994

TABLE 3.6C Population aged ten years and over by literacy status, highest grade completed and sex (Amhara Region-rural): 1994

TABLE 3.7 Population of weredas aged ten years and over by literacy status, highest grade completed (grouped), percent literate, sex, urban and rural: 1994

TABLE 3.8 Population of towns aged ten years and over by literacy status, highest grade completed (grouped), percent literate and sex: 1994

CHAPTER IV - ECONOMIC ACTIVITY STATUS

TABLE 4.1A Population aged ten years and over by age group,sex, activity status and rate (Amhara Region-total): 1994

TABLE 4.1B Population aged ten years and over by age group,sex, activity status and rate (Amhara Region-urban): 1994

TABLE 4.1C Population aged ten years and over by age group,sex, activity status and rate (Amhara Region-rural): 1994

TABLE 4.2 Population of zones aged ten years and over by sex, activity status and rate, urban and rural 1994:

TABLE 4.3 Population of towns aged ten years and over by sex, activity status and rate. 1994

TABLE 4.4A Economically non-active population aged ten years and over by age group, sex and reason for not working (Amhara Region-total): 1994

TABLE 4.4B Economically non-active population aged ten years and over by age group, sex and reason for not working (Amhara Region-urban): 1994

TABLE 4.4C Economically non-active population aged ten years and over by age group, sex and reason for not working (Amhara Region-rural): 1994

TABLE 4.5A Unemployed population aged ten years and over by sex and age group (Amhara Region -total): 1994

TABLE 4.5B Unemployed population aged ten years and over by sex and age group (Amhara Region -urban): 1994

TABLE 4.5C Unemployed population aged ten years and over by sex and age group (Amhara Region -rural): 1994

TABLE 4.6 Unemployed population of zones aged ten years and over by sex, urban and rural): 1994

TABLE 4.7 Unemployed population of towns aged ten years and over by sex: 1994

TABLE 4.8A Unemployed population aged ten years and over by age group, sex and educational level (Amhara Region-total): 1994

TABLE 4.8B Unemployed population aged ten years and over by age group, sex and educational level (Amhara Region-urban): 1994

TABLE 4.8C Unemployed population aged ten years and over by age group, sex and educational level (Amhara Region-rural): 1994

TABLE 4.9A Economically active population aged ten years and over by age group, sex and employment status (Amhara Region-total): 1994

TABLE 4.9B Economically active population aged ten years and over by age group, sex and employment status (Amhara Region-urban): 1994

TABLE 4.9C Economically active population aged ten years and over by age group, sex and employment status (Amhara Region-rural): 1994

TABLE 4.10A Economically active population aged ten years and over by age group, sex and major occupational groups (Amhara Region-total): 1994

TABLE 4.10B Economically active population aged ten years and over by age group, sex and major occupational groups (Amhara Region-urban): 1994

TABLE 4.10C Economically active population aged ten years and over by age group, sex and major occupational groups (Amhara Region-rural): 1994

TABLE 4.11 Economically active population aged ten years and over by sex and minor occupational groups (Amhara Region-total): 1994

TABLE 4.12A Economically active population aged ten years and over by age group, sex and major industrial divisions (Amhara Region-total): 1994

TABLE 4.12B Economically active population aged ten years and over by age group, sex and major industrial divisions (Amhara Region-urban): 1994

TABLE 4.12C Economically active population aged ten years and over by age group, sex and major industrial divisions (Amhara Region-rural): 1994

TABLE 4.13 Economically active population aged ten years and over by sex and minor industrial groups (Amhara Region-total): 1994

TABLE 4.14 Employed population of zones in urban areas aged ten years and over by sex and number of days worked:1994

ANNEX I - SUMMARY OF POPULATION SIZES

ANNEX TABLE 1 Total population of zones and weredas by sex, urban and rural: 1994

ANNEX TABLE 2 Total population of towns by sex: 1994

ANNEX TABLE 3 Population size by sex and age in single year, urban and rural: 1994

ANNEX TABLE 4 Population projection of Amhara Region by rural-urban, five years age group and sex, 1995 - 2000

VOLUME I: PART III

CHAPTER V - MIGRATION, FERTILITY AND MORTALITY

A - MIGRATION

TABLE 5.1A Population by age group, sex, migration status and area of previous residence (Amhara Region-total): 1994

TABLE 5.1B Population by age group, sex, migration status and area of previous residence (Amhara Region-urban): 1994

TABLE 5.1C Population by age group, sex, migration status and area of previous residence (Amhara Region-rural): 1994

TABLE 5.2A Population of zones by sex, migration status and area of previous residence, urban and rural: 1994

TABLE 5.2B Population of towns by sex, migration status and area of previous residence (Amhara Region):1944

TABLE 5.3A Migrant population by age group, sex and length of residence (Amhara Region-total): 1994

TABLE 5.3B Migrant population by age group, sex and length of residence (Amhara Region-urban): 1994

TABLE 5.3C Migrant population by age group, sex and length of residence (Amhara Region-rural): 1994

TABLE 5.4A Migrant population of zones by sex and length of residence, urban and rural):1994

TABLE 5.4B Migrant population of towns by sex and length of residence (Amhara Region): 1994

B - FERTILITY

TABLE 5.5A Summary measures of fertility based on reported data for zones, (Amhara Region: 1994

TABLE 5.5B Summary measures of fertility based on reported data for towns that have 10,000 and above persons, Amhara: 1994

TABLE 5.6A Women of child bearing age by age group, number of children born alive during the last twelve months, age specific fertility rate and total fertility rate, urban and rural: 1994

TABLE 5.6B Women of child bearing age by age group, number of children born alive during the last twelve months, age specific fertility rate and total fertility rate for major urban centers (with 10,000 or more inhabitants): 1994

TABLE 5.7 Women aged 10 years and over by age group, number of children everborn and mean number of children ever born: 1994

C- MORTALITY

TABLE 5.8A Estimated infant and child mortality rates derived by Trussell method and implied by the west Coale and Demeny model Life Table for zones, Amhara Region:1994

TABLE 5.8B Estimated infant and child mortality rates derived by Trussell method and implied by the west Coale and Demeny model Life Table for towns with population size of 10,000 and above persons, Amhara Region: 1994

TABLE 5.9A Women aged 10 years and over by age group, number of children ever born, number of children surviving and mean number of children ever born: 1994

TABLE 5.9B Women aged 10 years and over by age group, number of children ever born, number of children surviving and mean number of children ever born for major urban centers(with 10,000 and over population): 1994

ANNEX I - SUMMARY OF POPULATION SIZES

ANNEX TABLE 1 Total population of zones and weredas by sex, urban and rural: 1994

ANNEX TABLE 2 Total population of towns by sex: 1994

ANNEX TABLE 3 Population size by sex and age in single year, urban and rural: 1994

ANNEX TABLE 4 Population projection of Amhara Region by rural-urban, five years age group and sex, 1995 - 2000

VOLUME I: PART IV

CHAPTER VI - HOUSING CHARACTERISTICS AND CONDITIONS

TABLE 6.1 Housing units of towns by type of building: 1994

TABLE 6.2 Housing units of towns by type of construction:1994

TABLE 6.3 Housing units of zones and weredas by construction material of wall, urban and rural: 1994

TABLE 6.4 Housing units of zones and weredas by construction material of roof, urban and rural: 1994

TABLE 6.5 Housing units of towns by construction material of floor: 1994

TABLE 6.6 Housing units of towns by construction material of ceiling: 1994

TABLE 6.7 Housing units of zones and weredas by number of rooms and persons per room, urban and rural: 1994

ANNEX I - SUMMARY OF POPULATION SIZES

ANNEX TABLE 1 Total population of zones and weredas by sex, urban and rural: 1994

ANNEX TABLE 2 Total population of towns by sex: 1994

ANNEX TABLE 3 Population size by sex and age in single year, urban and rural: 1994

ANNEX TABLE 4 Population projection of Amhara Region by rural-urban, five years age group and sex, 1995 - 2000

39. WILL HOUSING UNIT INFORMATION TO BE COLLECTED ?

1= YES 2= NO

40. WHAT IS THE TOTAL NUMBER OF HOUSEHOLDS LIVING IN THE HOUSING UNIT ?

41. WHAT IS THE TOTAL NUMBER OF MEMBERS OF HOUSEHOLD OR HOUSEHOLDS IN THE HOUSING UNIT ?

MALE	FEMALE	TOTAL

42. WHAT IS THE TYPE OF HOUSING UNIT ?

1- PERMANENET
2= IMPROVISED
3= MOBILE
4= OTHER/SPECIFY/_____

43. WHAT IS THE TYPE OF BUILDING IN WHICH THE HOUSING UNIT IS FOUND?

0= NON-STOREYED DETACHED
1= NON-STOREYED 2 UNITS ATTACHED
2= NON-STOREYED 3-5 UNITS ATTACHED
3= NON-STOREYED 6 OR MORE UNITS ATTACHED
4= ONE OR MORE STOREYED DETACHED
5= ONE OR MORE STOREYED,2-3 UNITS ATTACHED
6= ONE OR MORE STOREYED, 4-6 UNITS ATTACHED
7= ONE OR MORE STOREYED,7-10 UNITS ATTACHED
8= ONE OR MORE STOREYED, 11 OR MORE UNITS ATTACHED

44. HOW MANY YEARS AGO WAS THE HOUSING UNIT BUILT ?

1= LESS THAN FIVE YEARS
2= 5-9 YEARS
3= 10-14 YEARS
4= 15-19 YEARS
5= 20 YEARS OR MORE

45. WHAT IS THE MAJOR MATERIAL USED FOR THE CONSTRUCTION OF THE WALL OF THE HOUSING UNIT ?

1= WOOD AND MUD
2= WOOD AND THATCH
3= STONE AND MUD
4= STONE AND CEMENT
5= BLOCKETS
6= BRICKS
7= REED/BAMBOO
8= OTHER/SPECIFY/_____

46. WHAT IS THE MATERIAL USED FOR THE CONSTRUCTION OF THE MAJOR PART OF THE ROOF OF THE HOUSING UNIT ?

1= CORRUGATED IRON SHEET
2= CONCRETE OR CEMENT
3= THATCH
4= WOOD AND MUD
5= BAMBOO OR REED
6= OTHER/SPECIFY/_____

47. WHAT IS THE MATERIAL USED FOR THE CONSTRUCTION OF THE MAJOR PART OF THE CEILING OF THE HOUSING UNIT ?

1= NONE
2= FABRICS
3= CHIPWOOD/HARD BOARD
4= WOODEN
5= CONCRETE
6= OTHER/SPECIFY/_____

48. WHAT IS THE MAJOR MATERIAL USED FOR THE CONSTRUCTION OF THE FLOOR OF THE HOUSING UNIT ?

1= MUD
2= WOOD TILES
3= CEMENT/CONCRETE FINISH
4= PLASTIC TILES
5= CEMENT BRICK TILE
6= BAMBOO OR REED
7= OTHER/SPECIFY/_____

49. HOW MANY ROOMS ARE THERE IN THE HOUSING UNIT?

_____

50. WHAT IS THE TYPE OF TENURE OF THE HOUSING UNIT ?

1= OWNER OCCUPIED
2= RENTED FROM KEBELE
3= RENTED FROM PUBLIC HOUSING AGENCY
4= RENTED FROM OTHER ORGANIZATION
5= PAYING DIFFERENCE IN RENT
6= RENTED FROM PRIVATE HOUSEHOLD
7= RENT FREE

51. IF RENTED, WHAT IS THE MONTHLY AMOUNT OF RENT IN BIRR ?

_____

52. WHAT IS THE MAIN SOURCE OF DRINKING WATER FOR THE MEMBERS OF THIS HOUSING UNIT ?

1= TAP INSIDE THE HOUSE
2= TAP IN COMPOUND, PRIVATE
3= TAP IN COMPOUND, SHARED
4= TAP OUTSIDE COMPOUND/ FROM PRIVATE TAP, PUBLIC TAP, OTHER ORGANIZATION, BOUGHT OR FREE OF CHARGE/
5= PROTECTED WELL OR SPRING
6= UNPROTECTED WELL OR SPRING
7= RIVER, LAKE/POND

53. WHAT TYPE OF KITCHEN DOES THE HOUSING UNIT HAVE?

1= NO KITCHEN
2= MODERN KITCHEN PRIVET
3= MODERN KITCHEN SHARED
4= TRADITIONAL KITCHEN PRIVATE
5= TRADITIONAL KITCHEN SHARED

54. WHAT TYPE OF FUEL IS MOSTLY USED FOR COOKING IN THE HOUSING UNIT ?

01= USES NO FUEL
02= ELECTRICITY
03= GAS
04= KEROSINE
05= CHARCOAL
06= FIREWOOD/LEAVES SAWDUST
07= DUNG/MANURE
08= FIREWOOD AND CHARCOAL
09= FIREWOOD AND DUNG
10= FIREWOOD AND KEROSINE
11= FIREWOOD AND GAS
12 =ELECTRICITY AND KEROSINE
13 =ELECTRICITY AND FIREWOOD
14 =ELECTRICITY AND CHARCOAL
15= ELECTRICITY AND GAS
16= OTHER/SPECIFY/_____

55. WHAT TYPE OF BATHING FACILITY DOES THE HOUSING UNIT HAVE ?

1= NONE
2= BATHTUB PRIVATE
3= BATHTUB SHARED
4= SHOWER PRIVATE
5= SHOWER SHARED
6= OTHER/SPECIFY/_____

56. WHAT TYPE OF TOILET FACILITY DOES THE HOUSING UNIT HAVE ?

1= NONE
2= FLUSH TOILET, PRIVATE
3= FLUSH TOILET, SHARED
4= PIT, PRIVATE
5= PIT, SHARED

57. WHAT TYPE OF LIGHTING HAS THE HOUSING UNIT ?

1= ELECTRICITY (METER PRIVATE)
2= ELECTRICITY (METER SHARED)
3= LANTERN
4= KEROSINE
5= OTHER/SPECIFY/_____

58. IS THERE A RADIO IN THIS HOUSING UNIT ?

1= YES
2= NO

59. IS THERE A TELEPHONE IN THIS HOSING UNIT ?

1= YES
2= NO

60. IS THERE A TELEVISION SET IN THIS HOUSING UNIT ?

1= YES
2= NO

Statistical data that reflect the socio-economic and demographic conditions of the residents of a country are useful for designing and preparation of development plans and for monitoring and evaluation of the impact of the implementation of the development plans. These statistical data include population size, age, sex, fertility, mortality, migration, literacy and education, marital status, occupation, industry, housing stocks and conditions, ...etc. In order to fill the gap for these Socio-economic and demographic data need, Ethiopia conducted its second National Population and Housing Census in October, 1994.

The 1994 Population and Housing Census of Ethiopia was conducted under the auspices of the Population and Housing Census Commission that was set up under Proclamation No. 32/1992. The Commission was chaired by the Prime Minister and the members of the commission were drawn from various relevant ministries. The Central Statistical Authority served as the Office of the Commission (Secretariat). Hence the processing, evaluation and analyses of the data collected in this census as well as its dissemination are the responsibilities of this office. As stated above the census was conducted in October 1994 and the resulting data are processed and evaluated. Volume I of the census report presents the Statistical Reports for Amhara Region which appear in four separate parts:

Volume I: Part I - Statistical Report on Population size and Characteristics.
Volume I: Part II - Statistical Report on Education and Economic Activity.
Volume I: Part III- Statistical Report on Migration, Fertility and Mortality.
Volume I: Part IV - Statistical Report on Housing Characteristics.

Thus, the Office of the Population and Housing Census Commission is pleased to present the census report "The 1994 Population and Housing Census of Ethiopia: Results for Amhara

Region, Volume I Part II - Statistical Report on Education and Economic Activity" for users. Another report which deals with the detailed analysis of the results of the 1994 Population and Housing Census data for Amhara Region will also be produced soon.

The 1994 Population and Housing Census was a huge nation wide operation which could not be undertaken by a single organization. Thus, full cooperation and assistance of government and non- government organizations, external donor agencies and the public in general was obtained. A number of preparatory activities were also carried-out before the census enumeration was begun. Among the major census preparatory activities was the conduct of the Population and Housing Census Map Work. In the census map work the peasant associations in rural areas and the urban dwellers associations in urban areas were sub-divided into enumeration areas with 150-200 housing units in urban areas and 150-200 households in rural areas. About 5-6 contiguous enumeration areas were formed into one supervision area. In this exercise enumeration area and supervision area maps were also prepared. In the census map work operation a total of 49,978 enumeration areas and 9,845 supervision areas were constructed in the settled rural areas and 8,724 enumeration areas and 1,575 supervision areas in the urban areas of the country. In Amhara Region a total of 15057 enumeration areas and 2964 supervision areas were delineated in the rural areas, and 1615 enumeration areas and 294 supervision areas in the urban areas.

During the census enumeration, one enumerator was given the map of one enumeration area and was responsible to record all persons and housing units in that enumeration area. One supervisor was later assigned to a supervision area and was responsible for the quality of the information collected in that area.

The Office of the Population and Housing Census Commission would like to thank all government and non-government agencies who participated in the organization of the census, the supervision of the field work, the data collection, and the respondents who participated in providing the necessary

information. The government of Ethiopia has given huge financial and unreserved administrative support in undertaking the 1994 National Population and Housing Census from its inception till the dissemination of the results. This indicates the commitment and high priority offered by the government for socio-economic and demographic data collection, processing, evaluation and dissemination of the results to users.

The Office would also like to take this opportunity to express its many thanks to the United Nations Population Fund (UNFPA) to its generous financial assistance and technical support in conducting the census. Moreover, thanks are due to United States Agency for International Development (USAID) for its financial and technical assistance for the census. Further thanks are due to the United Nations Development Program (UNDP) and to the Swedish International Development Authority (SIDA) for their financial assistance. The office hopes that the data presented in this report will be found useful by all data users.

Abdulahi Hasen(Ph.D.)

CHAPTER I

INTRODUCTION

This chapter presents an over view of the content of the census report " The 1994 Population and Housing Census of Ethiopia: Results for Amhara Region, Volume I: Part II - Statistical Report on Education and Economic Activity". This report presents information on education (school attendance, educational attainment,...etc.) and economic activity (activity rates, unemployment rates, occupational distribution, industrial groups, status, ...etc.). Summaries of population sizes (for zones, weredas, and towns; and projected population figures up to the year 2000) are also presented as an Annex. The data presented in this report constitute some of the major statistical tables that are essential to planners, administrators, researchers and other data users. The analytical report of the results of the census for Amhara Region will be presented in a separate report, and will deal with indepth analyses of the results. Other reports that also present information for Amhara Region are: Volume I: Part I- Statistical Report on Population Size and Characteristics; Volume I: Part III- Statistical Report on Migration, Fertility and Mortality; and Volume I: Part IV - Statistical Report on Housing Characteristics.

Amhara Region consists of ten zones and one Special zone i.e. Bahir Dar; 106 weredas, and 208 towns. The rural part of the region has 4980 farmers association areas, while the urban part has 337 kebeles in the 208 towns.

The 1994 Population and Housing Census was the second national population and housing census ever to be conducted in the country. The first population and housing census was conducted in May 1984. The Second Population and Housing Census of Ethiopia was conducted beginning 11 October, 1994 and was completed in most areas within the following ten days. Eleventh of October, 1994 was used as the census day. The questionnaires used for the census were prepared in Amharic.

English translations of the questionnaires used in the census are presented at the end of the report. The types of questionnaires used were:

i) Short Questionnaire (Appendix I)
ii) Long Urban Questionnaire (Appendix II)
iii) Long Rural Questionnaire (Appendix III)

The content of the short questionnaire was similar in urban and rural areas. The questionnaires were filled-in by enumerators who went from one household to the next. All members of the household were recorded on the same questionnaire. The short and the long questionnaires differed on the number of variables collected. The short questionnaire collected basic data on population such as population sizes, sex, age, language, ethnic group, religion, and marital status. In addition to these, the long questionnaire included data on disability, education, economic activity, migration, fertility, mortality, and housing stocks and conditions.

The type of questionnaire administered to each household was determined by using a systematic sampling selection procedure. During the three days before the census day all households, and housing units were listed in a separate form designed for the purpose. This list was used to identify the type of questionnaire that was to be administered to the households. One out of five households was selected to be interviewed using the long questionnaire, while the other four were interviewed using the short questionnaire. Residents of hotels, hostels and other collective quarters were always interviewed using the long questionnaire. Short questionnaire was also administered on the homeless persons.

Some of the information collected for the region which refers to population sizes, sex and age composition, language, ethnic, religious and marital distributions was collected from all persons

covered in the census. However, some other information was collected from only a sample of the population. This refers to disability, education, economic activity, migration, fertility, mortality, and housing stocks and conditions. Even though the above information was collected from a sample of the population, statistical weights were applied to the information collected in order to let them represent the entire population. This means that the numbers presented in the tables that refer to disability, education, economic activity,... etc. represent the entire population of Amhara Region and not only the sample population.

The fact that the information was collected from a sample of households and not from the entire households does not make the information less reliable. In fact this process increases the quality of the information collected by reducing the work load that would have been faced if all households were covered using the long questionnaires. The reduction of the work load improves the quality of the data because it is expected to facilitate a closer supervision during field work, enable better data coding and editing, and enable the timely processing of the data collected. The census was conducted by enumerators who went from house to house filling in the questionnaires designed for the purpose. Homeless persons were enumerated in the place where they were spending the night.

This report contains three chapters. The first chapter serves as an introduction to the report. Chapter III presents the educational characteristics of the population and Chapter IV deals with the economic characteristics in the region. Annex I presents summaries of population sizes for zones, weredas and towns and projected population sizes up to the year 2000. Annex II presents the list of tables on other parts of Volume I. The accompanying Volume I: Part I consists of Chapter II which presents the population sizes, sex, age, language, ethnic, religious, marital status and disability condition of the population. Volume I: Part III presents Chapter V which deals with migration, fertility and

mortality conditions. Another report entitled Volume I: Part IV presents Chapter VI which deals on the housing stocks and conditions in Amhara Region.

Because of the use of sampling in the collection of some of the information in the census, slight discrepancies between the various tables may be observed. Tables that deal with population size, sex, age, language, ethnic group, religion and marital status refer to the entire population. Tables that deal with disability, education, economic activity, migration, fertility, mortality exclude the homeless. Since the homeless population is very small compared to the population of Amhara Region, the discrepancies are very small. Homeless persons were enumerated using only the short questionnaire because the enumeration took place at night at the place where they were sleeping, and it was not convenient to apply long questionnaires in these situations. The Homeless were not included in the application of the statistical weights.

The tables presented here were selected from a long list of tables that have already been produced for Amhara Region. The forthcoming analytical report for the 1994 Population and Housing Census data of Amhara Region will also present some of these tables. The analytical report will concentrate more on providing indepth analysis rather than providing detailed tabulations. Analysis of the results of the census are expected to continue even after the production of the analytical report.

CHAPTER III

EDUCATIONAL CHARACTERISTICS

This chapter presents data on educational characteristics of the population of Amhara Region . The data was collected from members of the sampled household. Two questions on education were included in the census questionnaire to measure school attendance and educational attainment. The information was collected from persons who were covered using the long questionnaire. However, the information has been weighted and all the figures in this chapter refer to the entire population of Amhara Region.

Every person aged five years and over in a sampled household was asked to report his/her educational status. The three alternative answers given were (1) attending school during the census year, (2) attended school in the past and left during the census year and (3) never attended. The resulting data is given on Table 3.1A, 3.1B and 3.1C. Similarly, data on school attendance for zones classified by urban and rural areas is given in Table 3.2.

Those who were attending school during the census year were further asked to indicate the grade in which they were attending. The distribution of the region's population classified by age and grade attending is presented on Table 3.3A, 3.3B and 3.3C. Population of zones classified by grade are given in Table 3.4. In order to measure the proportion of students out of the school age population it is essential to compute gross and net enrollment ratios.

Gross enrollment ratio in primary education is defined as the ratio of students in primary education divided by total number of children aged 7-12 years (multiplied by 100 percent). Gross enrollment ratio in junior secondary education is the number of students in junior secondary education divided by total children aged 13-14 years (multiplied by 100 percent). Gross enrollment ratio in senior secondary education is the number of students in senior secondary education divided by total children

aged 15-18 years (multiplied by 100 percent). The gross enrollment ratios for primary, junior and senior secondary levels for weredas classified by urban and rural areas are presented in Table 3.5. Enrollment ratios that exceed 100 indicate enrollment of over-aged children in each level. Since this ratio does not consider the age distribution of the enrolled population the net enrollment ratio was calculated.

Net enrollment ratio in primary education is defined as students in primary education aged 7-12 years divided by total children aged 7-12 years (multiplied by 100 percent). Net enrollment ratio in junior secondary education is defined as students in junior secondary education aged 13-14 years divided by total children aged 13-14 years (multiplied by 100 percent). Net enrollment ratio in senior secondary education is the number of students in senior secondary education aged 15-18 years divided by total children aged 15-18 years (multiplied by 100 percent). The net enrollment ratios for weredas are presented in Table 3.5.

Data on educational attainment is also given in this chapter. Those who were attending school during the census day and attended in the past and left school prior to the census day were asked to state whether they were literate or not. If literate, respondents were further enquired to report the highest grade completed in the formal education system. Following the recommendation of the United Nations that states age of 10 years as the minimum age for compiling and analyzing data on educational attainment, Table 3.6A - 3.6C and Table 3.7 present data on educational attainment for the population aged 10 years and over for the region and weredas, respectively. Similarly, data on educational attainment for the towns is given in Table 3.8.

The report in general and this chapter in particular refers to formal education only. "A formal education is defined as education in which students are enrolled or registered regardless of the mode of teaching used. It includes both 'regular school and university

education' and 'adult education'. All regular schools and university education is essentially formal. Adult education, however, can be formal and non-formal. The 1994 population and housing census covered only the formal component of the adult education and all regular and university education.

Regular and University education is used to describe the system that provides a 'ladder' by which children and young people may progress from primary schools through universities (although many drop out on the way). Adult education is used to describe out-of-school education, which provides education for people who are not in the regular school and university system and who are generally fifteen or older (although in some circumstances, younger students are accommodated along with their older colleagues)" (United Nations, 1976).

CHAPTER IV

ECONOMIC ACTIVITY STATUS

In the 1994 population and housing census, information on economic activity status was collected for all persons aged ten years and over using the long questionnaire. The long questionnaire was administered only on selected households. The selection was done on the basis of systematic sampling and covered one fifth of the total households. However, statistical weights were later applied which makes the figures presented in this chapter to refer to the entire population. Information on economic activity collected in the census was:

a) whether engaged in productive work during the reference period.
b) reason for not being engaged in productive work during the reference period (for those who were not so engaged).
c) major type of occupation.
d) major product or service of the establishment or industry.
e) employment status in the main activity.
f) number of days worked during the last seven days for those engaged in productive work (for urban areas only).

The approaches used in the collection of the above information in urban and rural areas were different. The current status approach was employed in the urban areas, while the usual status approach was used in the rural areas. The main difference between the two approaches is in the length of the reference period. The current status approach is based on a short reference period, which in this case is the seven days before the census day. On the other hand, the usual status approach has a long reference period, that is, the twelve months before the census day.

In urban areas all persons aged ten years and over who were productively engaged for at least one day during the seven days reference period were classified as economically active. In rural

areas all persons aged ten years and over were classified to be participating in a productive activity if they were engaged in the production of economic goods and services during most of the twelve months prior to the census day. For those engaged in agricultural activities, persons who were engaged in agricultural and related work during most of the main agricultural season were classified to be economically active.

Economic or productive activity in the census was defined in terms of production of goods and services following the concepts presented in the United Nations System of National Accounts (SNA) production boundary (ILO, 1990a). Economic activity is defined as work which involves the production of goods or services for sell or exchange for other commodities including:- production and processing of primary products (agriculture, hunting, fishing, forestry and logging, and mining and quarrying) for own consumption, own account construction and fixed asset formation (expected life use of one year or more) for own use. Such activities could be performed for an individual, family or private enterprise, government establishment or public organization. The remuneration may be on daily, monthly, yearly or contract basis. However the activities of apprentices are considered as productive activity. On the other hand, unpaid household chores such as preparing food, cleaning the house, taking care of children or collecting firewood are not considered to be productive activities. In addition unpaid community and volunteer services and prostitution are classified as non-economic activities.

Economically Active and Non-active Population

The economically active population comprises all persons aged ten years and over who were employed and unemployed. The employed population consists of those who were engaged in productive activity for at least one day during the seven days prior to the census day for urban areas and most of the twelve months prior to the census day for rural areas. Persons who had regular jobs but

did not work during the reference period because of poor health, social reason, seasonality of work, annual leave or due to temporary closure of establishment were included as employed persons. The unemployed population consists of those who were not working during the reference period and were actively looking for work or were discouraged job seekers, that is, those who were not actively looking for work but were ready and willing to take up a job if one was available. A person who is looking for work but was engaged in a productive activity during the reference period is recorded as economically active and not as an unemployed person. The number of economically active and the non-active population by five year age group, sex and region is presented in Tables 4.1A - 4.1C. The tables also present activity rates which are defined as the percentage of the economically active over the total of the active plus the non-active population. Table 4.2 provides economic activity status and activity rate of zones by sex and urban/rural residence, while Table 4.3 shows economic activity status and activity rate of population of towns by sex.

The reason for not being engaged in an economic activity (for those who were not so engaged) is presented in Tables 4.4A - 4.4C. The reasons are classified as: students, homemakers, disabled, too young, pensioners, prostitutes and "others". However students, pensioners, ... etc. are considered economically active if they were productively engaged during the reference period. The distribution of the unemployed population by five year age group, sex and region is presented in Tables 4.5A - 4.5C. Table 4.6 provides unemployed population of zones by sex and urban/rural residence, while Table 4.7 shows unemployed population of towns by sex. Some of the towns in the region are very small, and because of the use of sampling in the census some bias was introduced in the estimation of rates of unemployment. Thus, high rates of unemployment was recorded for some towns while for some other towns law rates were recorded.

Type of Activity

Employed persons were asked about the type of occupation, and major product or industrial group of the establishment in which they were engaged during the reference period and the status of their employment. This information was also collected from unemployed persons who had previous work experience. The information collected from these persons referred to the job they held before they became unemployed. The information on type of activity was not collected from unemployed persons with no previous work experience. Therefore, analysis of economically active population by occupation, major product or type of service of their establishment and status will be based on a number fewer than the total economically active persons by the number of unemployed persons who never had any work experience.

A national occupation and industrial classification code list was prepared for the census. The list prepared closely followed the International Standard Classifications of Occupation (ILO,1990b) and International Standard Industrial Classification (UN, 1990) but took into account the prevailing national socio-economic conditions. These classifications were used for coding the responses on occupation and the type of industrial group of the establishment.

The distribution of the status in employment of the economically active population by five year age group and sex is presented in Tables 4.9A - 4.9C. The distribution of the economically active population by the major occupational group by five year age groups and sex appears in Tables 4.10A - 4.10C. The Sub-major and the minor occupational groups by sex and urban/rural residence appear in Table 4.11. Tables 4.12A - 4.12C present the distribution of the major industrial divisions classified by five year age groups and sex. The Sub-major and the minor industrial groups are presented by sex and urban/rural residence in Table 4.13. Table 4.14 presents the distribution of number of days worked

for the employed population by sex and zone. This table also presents the mean number of days worked by employed persons. The data presented in the table is limited to urban areas only because the number of days worked was not collected in rural areas.

VOLUME I: PART I

CHAPTER II - POPULATION SIZE AND CHARACTERISTICS

TABLE 2.1 Total population of zones and weredas by sex, urban and rural: 1994

TABLE 2.2 Total population of towns by sex: 1994

TABLE 2.3A Population size by broad age group, sex and type of residence (Amhara Region-total): 1994

TABLE 2.3B Population size by broad age group, sex and type of residence (Amhara Region-urban): 1994

TABLE 2.3C Population size by broad age group, sex and type of residence (Amhara Region-rural): 1994

TABLE 2.4 Population size of zones by sex and type of residence, urban and rural: 1994

TABLE 2.5 Household size and average number of persons per household in conventional households by zones, urban and rural: 1994

TABLE 2.6 Population size by sex and age in single year, urban and rural: 1994

TABLE 2.7 Population size of weredas by sex and age group, urban and rural: 1994

TABLE 2.8 Population size of towns by sex and age group: 1994

TABLE 2.9 Population size by ethnic group and sex, urban and rural: 1994

TABLE 2.10 Five major ethnic groups of weredas by sex, urban and rural: 1994

TABLE 2.11 Five major ethnic groups of towns by sex: 1994

TABLE 2.12 Population size by mother tongue and sex, urban and rural: 1994

TABLE 2.13 Five major mother tongues of weredas by sex, urban and rural: 1994

TABLE 2.14 Five major mother tongues of towns by sex: 1994

TABLE 2.15 Population size by second language spoken and sex, urban and rural: 1994

TABLE 2.16A Population size by religion, sex and age group (Amhara Region-total): 1994

TABLE 2.16B Population size by religion, sex and age group (Amhara Region-urban): 1994

TABLE 2.16C Population size by religion, sex and age group (Amhara Region-rural): 1994

TABLE 2.17 Population size of weredas by religion and sex, urban and rural: 1994

TABLE 2.18 Population size of towns by religion and sex: 1994

TABLE 2.19A Population in conventional households by relationship to head of household, sex and age group (Amhara Region-total):1994

TABLE 2.19B Population in conventional households by relationship to head of household, sex and age group (Amhara Region-urban):1994

TABLE 2.19C Population in conventional households by relationship to head of household, sex and age group (Amhara Region-rural):1994

TABLE 2.20A Population aged ten years and over by marital status, sex and age group (Amhara Region-total): 1994

TABLE 2.20B Population aged ten years and over by marital status, sex and age group (Amhara Region-urban): 1994

TABLE 2.20C Population aged ten years and over by marital status, sex and age group (Amhara Region-rural): 1994

TABLE 2.21 Population by broad age groups, disability status, type of disability and sex ratio: 1994

TABLE 2.22 Population by disability status and type of disability, urban and rural: 1994

ANNEX I - POPULATION PROJECTIONS

TABLE ANNEX I.1 Reported population size of Amhara Region by urban and rural areas October 11, 1994 census

TABLE ANNEX I.2 Population projection of Amhara Region by rural-urban, five years age group and sex, 1995 - 2000

ANNEX II - POPULATION SIZE OF KEBELES

TABLE ANNEX II.1 Total population of kebeles by sex, urban areas: 1994

TABLE ANNEX II.2 Total population of farmers' associations by sex, rural areas: 1994

VOLUME I: PART III

CHAPTER V - MIGRATION, FERTILITY AND MORTALITY

A - MIGRATION

TABLE 5.1A Population by age group, sex, migration status and area of previous residence (Amhara Region-total): 1994

TABLE 5.1B Population by age group, sex, migration status and area of previous residence (Amhara Region-urban): 1994

TABLE 5.1C Population by age group, sex, migration status and area of previous residence (Amhara Region-rural): 1994

TABLE 5.2A Population of zones by sex, migration status and area of previous residence, urban and rural: 1994

TABLE 5.2B Population of towns by sex, migration status and area of previous residence (Amhara Region):1944

TABLE 5.3A Migrant population by age group, sex and length of residence (Amhara Region-total): 1994

TABLE 5.3B Migrant population by age group, sex and length of residence (Amhara Region-urban): 1994

TABLE 5.3C Migrant population by age group, sex and length of residence (Amhara Region-rural): 1994

TABLE 5.4A Migrant population of zones by sex and length of residence, urban and rural):1994

TABLE 5.4B Migrant population of towns by sex and length of residence (Amhara Region): 1994

B - FERTILITY

TABLE 5.5A Summary measures of fertility based on reported data for zones, (Amhara Region: 1994

TABLE 5.5B Summary measures of fertility based on reported data for towns that have 10,000 and above persons, Amhara: 1994

TABLE 5.6A Women of child bearing age by age group, number of children born alive during the last twelve months, age specific fertility rate and total fertility rate, urban and rural: 1994

TABLE 5.6B Women of child bearing age by age group, number of children born alive during the last twelve months, age specific fertility rate and total fertility rate for major urban centers (with 10,000 or more inhabitants): 1994

TABLE 5.7 Women aged 10 years and over by age group, number of children everborn and mean number of children ever born: 1994

C- MORTALITY

TABLE 5.8A Estimated infant and child mortality rates derived by Trussell method and implied by the west Coale and Demeny model Life Table for zones, Amhara Region: 1994

TABLE 5.8B Estimated infant and child mortality rates derived by Trussell method and implied by the west Coale and Demeny model Life Table for towns with population size of 10,000 and above persons, Amhara Region: 1994

TABLE 5.9A Women aged 10 years and over by age group, number of children ever born, number of children surviving and mean number of children ever born: 1994

TABLE 5.9B Women aged 10 years and over by age group, number of children ever born, number of children surviving and mean number of children ever born for major urban centers(with 10,000 and over population): 1994

ANNEX I - SUMMARY OF POPULATION SIZES

ANNEX TABLE 1 Total population of zones and weredas by sex, urban and rural: 1994

ANNEX TABLE 2 Total population of towns by sex: 1994

ANNEX TABLE 3 Population size by sex and age in single year, urban and rural: 1994

ANNEX TABLE 4 Population projection of Amhara Region by rural-urban, five years age group and sex, 1995 - 2000

VOLUME I: PART IV

CHAPTER VI - HOUSING CHARACTERISTICS AND CONDITIONS

TABLE 6.1 Housing units of towns by type of building: 1994

TABLE 6.2 Housing units of towns by type of construction: 1994

TABLE 6.3 Housing units of zones and weredas by construction material of wall, urban and rural: 1994

TABLE 6.4 Housing units of zones and weredas by construction material of roof, urban and rural: 1994

TABLE 6.5 Housing units of towns by construction material of floor: 1994

TABLE 6.6 Housing units of towns by construction material of ceiling: 1994

TABLE 6.7 Housing units of zones and weredas by number of rooms and persons per room, urban and rural: 1994

TABLE 6.8 Housing units of weredas by whether livestock spend the night in the room where persons also spend the night in rural areas :1994

TABLE 6.9 Housing units of towns by total number of persons per housing unit: 1994

TABLE 6.10 Housing units of towns by number of households per housing unit: 1994

TABLE 6.11 Housing units of zones and weredas by source of drinking water, urban and rural: 1994

TABLE 6.12 Housing units of towns by source of drinking water: 1994

TABLE 6.13 Housing units of zones and weredas by availability of toilet facility, urban and rural: 1994

TABLE 6.14 Housing units of towns by type of toilet facility: 1994

TABLE 6.15 Housing units of towns by type of bathing facility: 1994

TABLE 6.16 Housing units of towns by type of lighting: 1994

TABLE 6.17 Housing units of towns by type of kitchen facility: 1994

TABLE 6.18 Housing units of zones and weredas by availability of kitchen in rural areas : 1994

TABLE 6.19 Housing units of zones and weredas by major type of fuel for cooking in rural areas :1994

TABLE 6.20 Housing units of town by major type of fuel for cooking: 1994

TABLE 6.21 Housing units of zones and weredas by availability of radio, urban and rural: 1994

TABLE 6.22 Housing units of towns by availability of radio, telephone and television: 1994

TABLE 6.23 Housing units of towns by type of tenure: 1994

TABLE 6.24 Rented housing units of towns by amount and average monthly rent: 1994

ANNEX I - SUMMARY OF POPULATION SIZES

ANNEX TABLE 1 Total population of zones and weredas by sex, urban and rural: 1994

ANNEX TABLE 2 Total population of towns by sex: 1994

ANNEX TABLE 3 Population size by sex and age in single year, urban and rural: 1994

ANNEX TABLE 4 Population projection of Amhara Region by rural-urban, five years age group and sex, 1995 - 2000

Appendix I Short Questionnaire (English translation)

1994 ETHIOPIAN POPULATION AND HOUSING CENSUS SHORT QUESTIONNAIRE - URBAN

LOCALITY NAME _____

SECTION 1 - AREA IDENTIFICATION

1. KILLIL	2. ZONE	3. WEREDA	4. TOWN	5. KEFETEGNA	6. SUPERVISION AREA	7. KEBELE	8. ENUMERATION AREA

SECTION 2 - TYPE OF RESIDENCE AND HOUSING UNIT PARTICULARS

9. TYPE OF RESIDENCE		10. HOUSING UNIT SERIAL NO.			11. HOUSE NO./SUB NO.	12. HOUSEHOLD SERIAL NO.		
1=CONVENTIONAL HOUSEHOLD 2= HOTEL/HOSTEL 3=OTHER COLLECTIVE QUARTERS 4= XXXX 5=HOMELESS								

SECTION 3 - PARTICULARS OF HOUSEHOLD MEMBERS

SERIAL NUMBER OF HOUSEHOLD MEMBERS	NAME OF USUAL HOUSEHOLD MEMBER	RESIDENCE STATUS	RELATIONSHIP TO HEAD OF HOUSEHOLD	SEX	AGE	RELIGION	LANGUAGE		ETHNIC GROUP	MARITAL STATUS
	LIST NAMES OF MEMBERS IN THE FOLLOWING ORDER -HEAD -SPOUSE -NEVER MARRIED CHILDREN ACCORDING TO SENIORITY IN AGE -MARRIED CHILDREN AND THEIR HOUSEHOLD MEMBERS WHO LIVE IN THIS HOUSING UNIT -OTHER RELATIVES -NON-RELATIVES -VISITORS	1= RESIDENT PRESENT 2= RESIDENT ABSENT 3= VISITOR	0=HEAD 1=SPOUSE 2=SON/DAUGHTER OF HEAD AND SPOUSE 3=SON/DAUGHTER OF HEAD 4=SON/DAUGHTER OF SPOUSE 5=MOTHER/FATHER OF HEAD/SPOUSE 6=SISTER/BROTHER OF HEAD/SPOUSE 7=OTHER RELATIVES 8=NON RELATIVES	1= MALE 2= FEMALE	WHAT IS ____'S AGE ? ENTER AGE IN COMPLETED YEARS. IF ____'S AGE IS UNDER ONE YEAR, ENTER '00' IN THE COLUMN	WHAT IS ____'S RELIGION ? 1=ORTHODOX 2=PROTESTANT 3=CATHOLIC 4=MUSLIM 5=TRADITIONAL 6=OTHER	WHAT IS ____'S MOTHER TONGUE ?	DOES ____ SPEAK ANOTHER LANGUAGE ? IF YES STATE THE MOST FREQUENTLY USED ADDITIONAL LANGUAGE. IF NO WRITE "DO NOT SPEAK"	WHAT IS ____'S ETHNIC GROUP ?	10 YEARS AND ABOVE 1=NEVER MARRIED 2=CURRENTLY MARRIED 3=DIVORCED 4=WIDOWED

SECTION 4 - DETAILED INFORMATION ON HOUSING UNIT

39. WILL HOUSING UNIT INFORMATION TO BE COLLECTED ?

1= YES 2= NO

40. WHAT IS THE TOTAL NUMBER OF HOUSEHOLDS LIVING IN THE HOUSING UNIT ?

41. WHAT IS THE TOTAL NUMBER OF MEMBERS OF HOUSEHOLD OR HOUSEHOLDS IN THE HOUSING UNIT ?

MALE	FEMALE	TOTAL

42. WHAT IS THE TYPE OF HOUSING UNIT ?

1= PERMANENET
2= IMPROVISED
3= MOBILE
4= OTHER/SPECIFY/_____

43. WHAT IS THE TYPE OF BUILDING IN WHICH THE HOUSING UNIT IS FOUND?

0= NON-STOREYED DETACHED
1= NON-STOREYED 2 UNITS ATTACHED
2= NON-STOREYED 3-5 UNITS ATTACHED
3= NON-STOREYED 6 OR MORE UNITS ATTACHED
4= ONE OR MORE STOREYED DETACHED
5= ONE OR MORE STOREYED,2-3 UNITS ATTACHED
6= ONE OR MORE STOREYED, 4-6 UNITS ATTACHED
7= ONE OR MORE STOREYED,7-10 UNITS ATTACHED
8= ONE OR MORE STOREYED, 11 OR MORE UNITS ATTACHED

44. HOW MANY YEARS AGO WAS THE HOUSING UNIT BUILT ?

1= LESS THAN FIVE YEARS
2= 5-9 YEARS
3= 10-14 YEARS
4= 15-19 YEARS
5= 20 YEARS OR MORE

45. WHAT IS THE MAJOR MATERIAL USED FOR THE CONSTRUCTION OF THE WALL OF THE HOUSING UNIT ?

1= WOOD AND MUD
2= WOOD AND THATCH
3= STONE AND MUD
4= STONE AND CEMENT
5= BLOCKETS
6= BRICKS
7= REED/BAMBOO
8= OTHER/SPECIFY/_____

46. WHAT IS THE MATERIAL USED FOR THE CONSTRUCTION OF THE MAJOR PART OF THE ROOF OF THE HOUSING UNIT ?

1= CORRUGATED IRON SHEET
2= CONCRETE OR CEMENT
3= THATCH
4= WOOD AND MUD
5= BAMBOO OR REED
6= OTHER/SPECIFY/_____

47. WHAT IS THE MATERIAL USED FOR THE CONSTRUCTION OF THE MAJOR PART OF THE CEILING OF THE HOUSING UNIT ?

1= NONE
2= FABRICS
3= CHIPWOOD/HARD BOARD
4= WOODEN
5= CONCRETE
6= OTHER/SPECIFY/_____

48. WHAT IS THE MAJOR MATERIAL USED FOR THE CONSTRUCTION OF THE FLOOR OF THE HOUSING UNIT ?

1= MUD
2= WOOD TILES
3= CEMENT/CONCRETE FINISH
4= PLASTIC TILES
5= CEMENT BRICK TILE
6= BAMBOO OR REED
7= OTHER/SPECIFY/_____

49. HOW MANY ROOMS ARE THERE IN THE HOUSING UNIT?

_____

50. WHAT IS THE TYPE OF TENURE OF THE HOUSING UNIT ?

1= OWNER OCCUPIED
2= RENTED FROM KEBELE
3= RENTED FROM PUBLIC HOUSING AGENCY
4= RENTED FROM OTHER ORGANIZATION
5= PAYING DIFFERENCE IN RENT
6= RENTED FROM PRIVATE HOUSEHOLD
7= RENT FREE

51. IF RENTED, WHAT IS THE MONTHLY AMOUNT OF RENT IN BIRR ?

_____

52. WHAT IS THE MAIN SOURCE OF DRINKING WATER FOR THE MEMBERS OF THIS HOUSING UNIT ?

1= TAP INSIDE THE HOUSE
2= TAP IN COMPOUND, PRIVATE
3= TAP IN COMPOUND, SHARED
4= TAP OUTSIDE COMPOUND/ FROM PRIVATE TAP, PUBLIC TAP, OTHER ORGANIZATION, BOUGHT OR FREE OF CHARGE/
5= PROTECTED WELL OR SPRING
6= UNPROTECTED WELL OR SPRING
7= RIVER, LAKE/POND

53. WHAT TYPE OF KITCHEN DOES THE HOUSING UNIT HAVE?

1= NO KITCHEN
2= MODERN KITCHEN PRIVET
3= MODERN KITCHEN SHARED
4= TRADITIONAL KITCHEN PRIVATE
5= TRADITIONAL KITCHEN SHARED

54. WHAT TYPE OF FUEL IS MOSTLY USED FOR COOKING IN THE HOUSING UNIT ?

01= USES NO FUEL
02= ELECTRICITY
03= GAS
04= KEROSINE
05= CHARCOAL
06= FIREWOOD/LEAVES SAWDUST
07= DUNG/MANURE
08= FIREWOOD AND CHARCOAL
09= FIREWOOD AND DUNG
10= FIREWOOD AND KEROSINE
11= FIREWOOD AND GAS
12 =ELECTRICITY AND KEROSINE
13 =ELECTRICITY AND FIREWOOD
14 =ELECTRICITY AND CHARCOAL
15= ELECTRICITY AND GAS
16= OTHER/SPECIFY/_____

55. WHAT TYPE OF BATHING FACILITY DOES THE HOUSING UNIT HAVE ?

1= NONE
2= BATHTUB PRIVATE
3= BATHTUB SHARED
4= SHOWER PRIVATE
5= SHOWER SHARED
6= OTHER/SPECIFY/_____

56. WHAT TYPE OF TOILET FACILITY DOES THE HOUSING UNIT HAVE ?

1= NONE
2= FLUSH TOILET, PRIVATE
3= FLUSH TOILET, SHARED
4= PIT, PRIVATE
5= PIT, SHARED

57. WHAT TYPE OF LIGHTING HAS THE HOUSING UNIT ?

1= ELECTRICITY (METER PRIVATE)
2= ELECTRICITY (METER SHARED)
3= LANTERN
4= KEROSINE
5= OTHER/SPECIFY/_____

58. IS THERE A RADIO IN THIS HOUSING UNIT ?

1= YES
2= NO

59. IS THERE A TELEPHONE IN THIS HOSING UNIT ?

1= YES
2= NO

60. IS THERE A TELEVISION SET IN THIS HOUSING UNIT ?

1= YES
2= NO

F O R E W O R D

Statistical data that reflect the socio-economic and demographic conditions of the residents of a country are useful for designing and preparation of development plans and for monitoring and evaluation of the impact of the implementation of the development plans. These statistical data include population size, age, sex, fertility, mortality, migration, literacy and education, marital status, occupation, industry, housing stocks and conditions, ...etc. In order to fill the gap for these Socio-economic and demographic data need, Ethiopia conducted its second National Population and Housing Census in October, 1994.

The 1994 Population and Housing Census of Ethiopia was conducted under the auspices of the Population and Housing Census Commission that was set up under Proclamation No. 32/1992. The Commission was chaired by the Prime Minister and the members of the commission were drawn from various relevant ministries. The Central Statistical Authority served as the Office of the Commission (Secretariat). Hence the processing, evaluation and analyses of the data collected in this census as well as its dissemination are the responsibilities of this office. As stated above the census was conducted in October 1994 and the resulting data are processed and evaluated. Volume I of the census report presents the Statistical Reports for Amhara Region which appear in four separate parts:

Volume I: Part I - Statistical Report on Population size and Characteristics.
Volume I: Part II - Statistical Report on Education and Economic Activity.
Volume I: Part III- Statistical Report on Migration, Fertility and Mortality.
Volume I: Part IV - Statistical Report on Housing Characteristics.

Thus, the Office of the Population and Housing Census Commission is pleased to present the census report "The 1994 Population and Housing Census of Ethiopia: Results for Amhara

Region, Volume I: Part III - Statistical Report on Migration, Fertility and Mortality" for users. Another report which deals with the detailed analysis of the results of the 1994 Population and Housing Census data for Amhara Region will also be produced soon.

The 1994 Population and Housing Census was a huge nation wide operation which could not be undertaken by a single organization. Thus, full cooperation and assistance of government and non- government organizations, external donor agencies and the public in general was obtained. A number of preparatory activities were also carried-out before the census enumeration was begun. Among the major census preparatory activities was the conduct of the Population and Housing Census Map Work. In the census map work the peasant associations in rural areas and the urban dwellers associations in urban areas were sub-divided into enumeration areas with 150-200 housing units in urban areas and 150-200 households in rural areas. About 5-6 contiguous enumeration areas were formed into one supervision area. In this exercise enumeration area and supervision area maps were also prepared. In the census map work operation a total of 49,978 enumeration areas and 9,845 supervision areas were constructed in the settled rural areas and 8,724 enumeration areas and 1,575 supervision areas in the urban areas of the country. In Amhara Region a total of 15057 enumeration areas and 2964 supervision areas were delineated in the rural areas, and 1615 enumeration areas and 294 supervision areas in the urban areas.

During the census enumeration, one enumerator was given the map of one enumeration area and was responsible to record all persons and housing units in that enumeration area. One supervisor was later assigned to a supervision area and was responsible for the quality of the information collected in that area.

The Office of the Population and Housing Census Commission would like to thank all government and non-government agencies who participated in the organization of the census, the supervision of the field work, the data collection, and the

respondents who participated in providing the necessary information. The government of Ethiopia has given huge financial and unreserved administrative support in undertaking the 1994 National Population and Housing Census from its inception till the dissemination of the results. This indicates the commitment and high priority offered by the government for socio-economic and demographic data collection, processing, evaluation and dissemination of the results to users.

The Office would also like to take this opportunity to express its many thanks to the United Nations Population Fund (UNFPA) to its generous financial assistance and technical support in conducting the census. Moreover, thanks are due to United States Agency for International Development (USAID) for its financial and technical assistance for the census. Further thanks are due to the United Nations Development Program (UNDP) and to the Swedish International Development Authority (SIDA) for their financial assistance. The office hopes that the data presented in this report will be found useful by all data users.

Abdulahi Hasen(Ph.D.)

Member
and
Secretary,
Central Census Commission

CHAPTER I

INTRODUCTION

This chapter presents an over view of the content of the census report " The 1994 Population and Housing Census of Ethiopia: Results for Amhara Region, Volume I: Part III - Statistical Report on Migration, Fertility and Mortality ". This report presents information on migration (migration status and length of residence), fertility levels and mortality conditions of the population. Summaries of population sizes (for zones, weredas, and towns; and projected population figures up to the year 2000) are also presented as an Annex. The data presented in this report constitute some of the major statistical tables that are essential to planners, administrators, researchers and other data users. The analytical report of the results of the census for Amhara Region will be presented in a separate report, and will deal with indepth analyses of the results. Other reports that also present information for Amhara Region are: Volume I: Part I- Statistical Report on Population Size and Characteristics; Volume I: Part II- Statistical Report on Education and Economic Characteristics; Volume I: Part IV- Statistical Report on Housing Characteristics.

Amhara Region consists of ten zones and one Special zone i.e. Bahir Dar; 106 weredas, and 208 towns. The rural part of the region has 4980 farmers association areas, while the urban part has 337 kebeles in the 208 towns.

The 1994 Population and Housing Census was the second national population and housing census ever to be conducted in the country. The first population and housing census was conducted in May 1984. The Second Population and Housing Census of Ethiopia was conducted beginning 11 October 1994 and was completed in most areas within the following ten days. Eleventh of October 1994 was used as the census day. The questionnaires used for the census were prepared in Amharic. English translations of the questionnaires used in the census are

presented at the end of the report. The types of questionnaires used were:

i) Short Questionnaire (Appendix I)
ii) Long Urban Questionnaire (Appendix II)
iii) Long Rural Questionnaire (Appendix III)

The content of the short questionnaire was similar in urban and rural areas. The questionnaires were filled-in by enumerators who went from one household to the next. All members of the household were recorded on the same questionnaire. The short and the long questionnaires differed on the number of variables collected. The short questionnaire collected basic data on population such as population sizes, sex, age, language, ethnic group, religion, and marital status. In addition to these, the long questionnaire included data on disability, education, economic activity, migration, fertility, mortality, and housing stocks and conditions.

The type of questionnaire administered to each household was determined by using a systematic sampling selection procedure. During the three days before the census day all households, and housing units were listed in a separate form designed for the purpose. This list was used to identify the type of questionnaire that was to be administered to the households. One out of five households was selected to be interviewed using the long questionnaire, while the other four were interviewed using the short questionnaire. Residents of hotels, hostels and other collective quarters were always interviewed using the long questionnaire. Short questionnaire was also administered on the homeless persons.

Some of the information collected for the region which refers to population sizes, sex and age composition, language, ethnic, religious and marital distributions was collected from all persons covered in the census. However, some other information was

collected from only a sample of the population. This refers to disability, education, economic activity, migration, fertility, mortality, and housing stocks and conditions. Even though the above information was collected from a sample of the population, statistical weights were applied to the information collected in order to let them represent the entire population. This means that the numbers presented in the tables that refer to disability, education, economic activity,... etc. represent the entire population of Amhara Region and not only the sample population.

The fact that the information was collected from a sample of households and not from the entire households does not make the information less reliable. In fact this process increases the quality of the information collected by reducing the work load that would have been faced if all households were covered using the long questionnaires. The reduction of the work load improves the quality of the data because it is expected to facilitate a closer supervision during field work, enable better data coding and editing, and enable the timely processing of the data collected. The census was conducted by enumerators who went from house to house filling in the questionnaires designed for the purpose. Homeless persons were enumerated in the place where they were spending the night.

This report contains two chapters. The first chapter serves as an introduction to the report. Chapter V presents the migration, fertility and mortality conditions. Annex I presents summaries of population sizes for zones, weredas and towns and projected population sizes up to the year 2000. The accompanying Volume I: Part I consists of Chapter II which presents the population sizes, sex, age, language, ethnic, religious, marital status and disability condition of the population. Volume I: Part II presents Chapter III which deals with education, and Chapter IV which deals on economic characteristics. Another report entitled Volume I: Part IV presents Chapter VI which deals on the housing stocks and conditions in Amhara Region.

Because of the use of sampling in the collection of some of the information in the census, slight discrepancies between the various tables may be observed. Tables that deal with population size, sex, age, language, ethnic group, religion and marital status refer to the entire population. Tables that deal with disability, education, economic activity, migration, fertility, mortality exclude the homeless. Since the homeless population is very small compared to the population of Amhara Region, the discrepancies are very small. Homeless persons were enumerated using only the short questionnaire because the enumeration took place at night at the place where they were sleeping, and it was not convenient to apply long questionnaires in these situations. The Homeless were not included in the application of the statistical weights.

The tables presented here were selected from a long list of tables that have already been produced for Amhara Region. The forthcoming analytical report for the 1994 Population and Housing Census data of Amhara Region will also present some of these tables. The analytical report will concentrate more on providing indepth analysis rather than providing detailed tabulations. Analysis of the results of the census are expected to continue even after the production of the analytical report.

CHAPTER V

MIGRATION, FERTILITY, AND MORTALITY

The previous chapters in this volume dealt on the description of the characteristics of the population. Part III deals with the changes (dynamics) that are occurring in the population. These are migration, fertility and mortality. The first section deals with migration and it will be followed by fertility and mortality.

A. MIGRATION

Information on migration of a population is of direct interest to planning and implementing agencies as well as academic institutions, because migration has a direct effect on the geographic distribution of the population. Moreover, migration has an interaction with other demographic forces as well as other aspects of social and economic changes. In recognition of the importance of this variable as one of the components of population change, data on migration was collected in the 1994 Population and Housing Census of Ethiopia.

In the 1994 census, two migration related questions were employed. These were: " Length of continuous residence" and "Place of previous residence". The former question provides information on the timing of migration while the later provides information on area of origin.

The "length of residence" of each person refers to the number of years the person has been continuously residing in a town or rural part of the wereda of enumeration. The length of stay was recorded in completed years.

In the census, information on length of residence was collected differently in the urban and rural parts of the country. The question asked in the urban areas referred to the

number of years the person has been continuously residing in the town. In the rural areas, the question referred to the number of years the person has been continuously residing in the rural parts of the wereda of enumeration.

Thus, in the urban areas a person who was born in a given town and has been continuously residing there is considered as a non-migrant. However, if the person was born in another town or any rural part of the country, then, he/she is considered as a migrant. Similarly, a person who was born in the town of enumeration but at one time or another resided in a different town or a rural area and has returned to the town of enumeration is considered as a migrant(return migrant).

In the rural areas, a person who was born in a rural area of wereda of enumeration and has been continuously residing there is considered as a non-migrant. However, if the person was born in a rural part of another wereda or any town , then, he/she is considered as a migrant. Similarly, a person who was born in the rural part of the wereda of enumeration but at one time or another resided in a rural part of a different wereda or any town and has returned to the rural part of the wereda of enumeration, is considered as a migrant(return migrant).

The "area of previous residence" refers to the area where the migrant has been residing before he/she migrated to the area of enumeration. In the census, the " area of previous residence" of migrants was recorded as "rural" or "urban" if the person has migrated from rural or urban areas, respectively. This enables the classification of all migrants as migrants from rural or urban areas.

This section presents the main findings based on the two migration related questions discussed above for Amhara region. Tables 5.1A - 5.1C present population by age group, sex, migration status, area of previous residence of migrants and area of enumeration . Tables 5.2A - 5.2B present population by sex, migration status, area of previous residence of migrants and area of enumeration (zones, urban, rural, and towns). Tables 5.3A -

5.3C present the length of residence of the in-migrants (classified by age and sex of in-migrants) in area of enumeration. Finally, Tables 5.4A - 5.4B present in-migrants by sex, length of residence in the area of enumeration (zones, urban, rural and town). The length of residence classifications used were less than one year, one year, two years, three years, four years, 5-6 years, 7-9 years and 10 years and above.

B. **FERTILITY**

This section presents the fertility level of the population of Amhara Region. In the 1994 Population and Housing Census Questionnaire information was collected on both current and retrospective fertility from every woman aged 10 years and over.

Data on current fertility was obtained by asking, "Did you have a live birth during the last twelve months prior to the census day?." Information on retrospective fertility was obtained by asking about the total number of children ever born alive, number of children living at home, number of children living elsewhere, and number who had died up to the census day.

Generally, data on current and retrospective fertility collected in censuses of developing countries are not usually free from error. Data on total number of children ever born may also be distorted due to recall-lapse and socio-cultural factors, above all, because of the extended family system in the country, the women are likely to include relatives with their own. Again, the various social practices associated with birth of small babies, especially those births that end in early death are likely to have been omitted from reporting. Another source of error in the reported number of children could be the inclusion of still births. These probable errors should be borne in mind while interpreting reported fertility measures presented in this section.

Reported Current Fertility

Based on the question asked about number of births given in the year preceding the census day, reported fertility measures were computed and presented in Table 5.5A and 5.5B. The measures include Crude Birth Rate (CBR), General Fertility Rate (GFR) and Total Fertility Rate (TFR).

The Crude Birth Rate refers to the total number of births occurring in a given year per 1000 mid-year population. The General Fertility Rate is defined as the number of births

occurring in a given year per 1000 women in the reproductive ages (i.e. women aged 15-49).

The other fertility parameter which takes into account the age structure of the population is what is known as Total Fertility Rate (TFR). Total Fertility Rate refers to the number of children a woman is likely to reproduce at the end of her reproductive period given the current age-schedule of fertility rate. Reported total fertility rate for Amhara Region is about 4.3 children per woman. The corresponding figure in urban and rural areas of Amhara Region were 2.7 and 4.5 respectively.

The above mentioned fertility measures indicate only the level of fertility. Tables 5.6 and 5.7 give the number of women and births by age and the corresponding age specific fertility rate-ASFR (the ratio of births to women in each age group). The age specific fertility rates reveal that about 64.5 percent of the total births given in the year preceding the census day are born by women in the age group 20-34. The women in the early twenties (20-24) and thirties (30-34) and late twenties (25-29) are the most fertile. The observed pattern of fertility by age group holds true for both urban and rural areas.

The analysis on current fertility excludes women who did not state number of births they had during the 12 months before the census day. Hence the number of women in the various age groups in this table may not be consistent with other figures in the report.

Cumulative Fertility

The other fertility index of interest is the mean number of children ever born presented in Table 5.8 the total, rural and urban areas of the region. Summary measure on mean number of children ever born for each zone and each urban center that has 10,000 and above persons is also presented in Tables 5.10 and 5.11. Completed fertility is imputed from data on number of children ever born by women aged 45-49 years. Comparison of the mean number of children ever born at age group 45-49 and TFR,

revealed a difference of one and a half child for total and rural areas, and about 2.7 children for urban areas. This pronounced difference in the urban areas (about 3 children) may indicate that fertility is declining recently in the urban areas of the region.

The fertility measures reported in this section are all reported levels. No attempt has been made to make adjustments to the levels of fertility. Detailed analysis of the level of fertility will be made in the analytical report that will be forthcoming soon.

SECTION 4 - DETAILED INFORMATION ON HOUSING UNIT

39. WILL HOUSING UNIT INFORMATION TO BE COLLECTED ?

1= YES 2= NO

40. WHAT IS THE TOTAL NUMBER OF HOUSEHOLDS LIVING IN THE HOUSING UNIT ?

41. WHAT IS THE TOTAL NUMBER OF MEMBERS OF HOUSEHOLD OR HOUSEHOLDS IN THE HOUSING UNIT ?

MALE	FEMALE	TOTAL

42. WHAT IS THE TYPE OF HOUSING UNIT ?

1= PERMANENET
2= IMPROVISED
3= MOBILE
4= OTHER/SPECIFY/_____

43. WHAT IS THE TYPE OF BUILDING IN WHICH THE HOUSING UNIT IS FOUND?

0= NON-STOREYED DETACHED
1= NON-STOREYED 2 UNITS ATTACHED
2= NON-STOREYED 3-5 UNITS ATTACHED
3= NON-STOREYED 6 OR MORE UNITS ATTACHED
4= ONE OR MORE STOREYED DETACHED
5= ONE OR MORE STOREYED,2-3 UNITS ATTACHED
6= ONE OR MORE STOREYED, 4-6 UNITS ATTACHED
7= ONE OR MORE STOREYED,7-10 UNITS ATTACHED
8= ONE OR MORE STOREYED, 11 OR MORE UNITS ATTACHED

44. HOW MANY YEARS AGO WAS THE HOUSING UNIT BUILT ?

1= LESS THAN FIVE YEARS
2= 5-9 YEARS
3= 10-14 YEARS
4= 15-19 YEARS
5= 20 YEARS OR MORE

45. WHAT IS THE MAJOR MATERIAL USED FOR THE CONSTRUCTION OF THE WALL OF THE HOUSING UNIT ?

1= WOOD AND MUD
2= WOOD AND THATCH
3= STONE AND MUD
4= STONE AND CEMENT
5= BLOCKETS
6= BRICKS
7= REED/BAMBOO
8= OTHER/SPECIFY/_____

46. WHAT IS THE MATERIAL USED FOR THE CONSTRUCTION OF THE MAJOR PART OF THE ROOF OF THE HOUSING UNIT ?

1= CORRUGATED IRON SHEET
2= CONCRETE OR CEMENT
3= THATCH
4= WOOD AND MUD
5= BAMBOO OR REED
6= OTHER/SPECIFY/_____

47. WHAT IS THE MATERIAL USED FOR THE CONSTRUCTION OF THE MAJOR PART OF THE CEILING OF THE HOUSING UNIT ?

1= NONE
2= FABRICS
3= CHIPWOOD/HARD BOARD
4= WOODEN
5= CONCRETE
6= OTHER/SPECIFY/_____

48. WHAT IS THE MAJOR MATERIAL USED FOR THE CONSTRUCTION OF THE FLOOR OF THE HOUSING UNIT ?

1= MUD
2= WOOD TILES
3= CEMENT/CONCRETE FINISH
4= PLASTIC TILES
5= CEMENT BRICK TILE
6= BAMBOO OR REED
7= OTHER/SPECIFY/_____

49. HOW MANY ROOMS ARE THERE IN THE HOUSING UNIT?

_____

50. WHAT IS THE TYPE OF TENURE OF THE HOUSING UNIT ?

1= OWNER OCCUPIED
2= RENTED FROM KEBELE
3= RENTED FROM PUBLIC HOUSING AGENCY
4= RENTED FROM OTHER ORGANIZATION
5= PAYING DIFFERENCE IN RENT
6= RENTED FROM PRIVATE HOUSEHOLD
7= RENT FREE

51. IF RENTED, WHAT IS THE MONTHLY AMOUNT OF RENT IN BIRR ?

_____

52. WHAT IS THE MAIN SOURCE OF DRINKING WATER FOR THE MEMBERS OF THIS HOUSING UNIT ?

1= TAP INSIDE THE HOUSE
2= TAP IN COMPOUND, PRIVATE
3= TAP IN COMPOUND, SHARED
4= TAP OUTSIDE COMPOUND/ FROM PRIVATE TAP, PUBLIC TAP, OTHER ORGANIZATION, BOUGHT OR FREE OF CHARGE/
5= PROTECTED WELL OR SPRING
6= UNPROTECTED WELL OR SPRING
7= RIVER, LAKE/POND

53. WHAT TYPE OF KITCHEN DOES THE HOUSING UNIT HAVE?

1= NO KITCHEN
2= MODERN KITCHEN PRIVET
3= MODERN KITCHEN SHARED
4= TRADITIONAL KITCHEN PRIVATE
5= TRADITIONAL KITCHEN SHARED

54. WHAT TYPE OF FUEL IS MOSTLY USED FOR COOKING IN THE HOUSING UNIT ?

01= USES NO FUEL
02= ELECTRICITY
03= GAS
04= KEROSINE
05= CHARCOAL
06= FIREWOOD/LEAVES SAWDUST
07= DUNG/MANURE
08= FIREWOOD AND CHARCOAL
09= FIREWOOD AND DUNG
10= FIREWOOD AND KEROSINE
11= FIREWOOD AND GAS
12 =ELECTRICITY AND KEROSINE
13 =ELECTRICITY AND FIREWOOD
14 =ELECTRICITY AND CHARCOAL
15= ELECTRICITY AND GAS
16= OTHER/SPECIFY/_____

55. WHAT TYPE OF BATHING FACILITY DOES THE HOUSING UNIT HAVE ?

1= NONE
2= BATHTUB PRIVATE
3= BATHTUB SHARED
4= SHOWER PRIVATE
5= SHOWER SHARED
6= OTHER/SPECIFY/_____

56. WHAT TYPE OF TOILET FACILITY DOES THE HOUSING UNIT HAVE ?

1= NONE
2= FLUSH TOILET, PRIVATE
3= FLUSH TOILET, SHARED
4= PIT, PRIVATE
5= PIT, SHARED

57. WHAT TYPE OF LIGHTING HAS THE HOUSING UNIT ?

1= ELECTRICITY (METER PRIVATE)
2= ELECTRICITY (METER SHARED)
3= LANTERN
4= KEROSINE
5= OTHER/SPECIFY/_____

58. IS THERE A RADIO IN THIS HOUSING UNIT ?

1= YES
2= NO

59. IS THERE A TELEPHONE IN THIS HOSING UNIT ?

1= YES
2= NO

60. IS THERE A TELEVISION SET IN THIS HOUSING UNIT ?

1= YES
2= NO

Statistical data that reflect the socio-economic and demographic conditions of the residents of a country are useful for designing and preparation of development plans and for monitoring and evaluation of the impact of the implementation of the development plans. These statistical data include population size, age, sex, fertility, mortality, migration, literacy and education, marital status, occupation, industry, housing stocks and conditions, ...etc. In order to fill the gap for these Socio-economic and demographic data need, Ethiopia conducted its second National Population and Housing Census in October, 1994.

The 1994 Population and Housing Census of Ethiopia was conducted under the auspices of the Population and Housing Census Commission that was set up under Proclamation No. 32/1992. The Commission was chaired by the Prime Minister and the members of the commission were drawn from various relevant ministries. The Central Statistical Authority served as the Office of the Commission (Secretariat). Hence the processing, evaluation and analyses of the data collected in this census as well as its dissemination are the responsibilities of this office. As stated above the census was conducted in October 1994 and the resulting data are processed and evaluated. Volume I of the census report presents the Statistical Reports for Amhara Region which appear in four separate parts:

Volume I: Part I - Statistical Report on Population size and Characteristics.
Volume I: Part II - Statistical Report on Education and Economic Activity.
Volume I: Part III- Statistical Report on Migration Fertility and Mortality.
Volume I: Part IV - Statistical Report on Housing Characteristics.

Thus, the Office of the Population and Housing Census Commission is pleased to present the census report "The 1994 Population and Housing Census of Ethiopia: Results for Amhara

Region, Volume I Part IV - Statistical Report on Housing Characteristics" for users. Another report which deals with the detailed analysis of the results of the 1994 Population and Housing Census data for Amhara Region will also be produced soon.

The 1994 Population and Housing Census was a huge nation wide operation which could not be undertaken by a single organization. Thus, full cooperation and assistance of government and non- government organizations, external donor agencies and the public in general was obtained. A number of preparatory activities were also carried-out before the census enumeration was begun. Among the major census preparatory activities was the conduct of the Population and Housing Census Map Work. In the census map work the peasant associations in rural areas and the urban dwellers associations in urban areas were sub-divided into enumeration areas with 150-200 housing units in urban areas and 150-200 households in rural areas. About 5-6 contiguous enumeration areas were formed into one supervision area. In this exercise enumeration area and supervision area maps were also prepared. In the census map work operation a total of 49,978 enumeration areas and 9,845 supervision areas were constructed in the settled rural areas and 8,724 enumeration areas and 1,575 supervision areas in the urban areas of the country. In Amhara Region a total of 15057 enumeration areas and 2964 supervision areas were delineated in the rural areas, and 1615 enumeration areas and 294 supervision areas in the urban areas.

During the census enumeration, one enumerator was given the map of one enumeration area and was responsible to record all persons and housing units in that enumeration area. One supervisor was later assigned to a supervision area and was responsible for the quality of the information collected in that area.

The Office of the Population and Housing Census Commission would like to thank all government and non-government agencies who participated in the organization of the census, the supervision of the field work, the data collection, and the respondents who participated in providing the necessary

information. The government of Ethiopia has given huge financial and unreserved administrative support in undertaking the 1994 National Population and Housing Census from its inception till the dissemination of the results. This indicates the commitment and high priority offered by the government for socio-economic and demographic data collection, processing, evaluation and dissemination of the results to users.

The Office would also like to take this opportunity to express its many thanks to the United Nations Population Fund (UNFPA) to its generous financial assistance and technical support in conducting the census. Moreover, thanks are due to United States Agency for International Development (USAID) for its financial and technical assistance for the census. Further thanks are due to the United Nations Development Program (UNDP) and to the Swedish International Development Authority (SIDA) for their financial assistance. The office hopes that the data presented in this report will be found useful by all data users.

Abdulahi Hasen(Ph.D.)

Member
and
Secretary,
Central Census Commission

CHAPTER I

INTRODUCTION

This chapter presents an over view of the content of the census report " The 1994 Population and Housing Census of Ethiopia: Results for Amhara Region, Volume I Part IV - Statistical Report on Housing Characteristics". This report presents information on housing stocks and conditions in the region. Summaries of population sizes (for zones, weredas, and towns; and projected population figures up to the year 2000) are also presented as an Annex. The data presented in this report constitute some of the major statistical tables that are essential to planners, administrators, researchers and other data users. The analytical report of the results of the census for Amhara Region will be presented in a separate report, and will deal with indepth analyses of the results. Other reports that also present information for Amhara Region are: Volume I: Part I- Statistical Report on Population Size and Characteristics; Volume I: Part II- Statistical Report on Education and Economic Characteristics; Volume I: Part III- Statistical Report on Education and Economic Activity.

Amhara Region consists of ten zones and one Special zone i.e. Bahir Dar; 106 weredas, and 208 towns. The rural part of the region has 4980 farmers association areas, while the urban part has 337 kebeles in the 208 towns.

The 1994 Population and Housing Census was the second national population and housing census ever to be conducted in the country. The first population and housing census was conducted in May 1984. The Second Population and Housing Census of Ethiopia was conducted beginning 11 October, 1994 and was completed in most areas within the following ten days. Eleventh of October, 1994 was used as the census day. The questionnaires used for the census were Prepared in Amharic. English translations of the questionnaires used in the census are presented at the end of the report. The types of questionnaires used were:

i) Short Questionnaire (Appendix I)
ii) Long Urban Questionnaire (Appendix II)
iii) Long Rural Questionnaire (Appendix III)

The content of the short questionnaire was similar in urban and rural areas. The questionnaires were filled-in by enumerators who went from one household to the next. All members of the household were recorded on the same questionnaire. The short and the long questionnaires differed on the number of variables collected. The short questionnaire collected basic data on population such as population sizes, sex, age, language, ethnic group, religion, and marital status. In addition to these, the long questionnaire included data on disability, education, economic activity, migration, fertility, mortality, and housing stocks and conditions.

The type of questionnaire administered to each household was determined by using a systematic sampling selection procedure. During the three days before the census day all households, and housing units were listed in a separate form designed for the purpose. This list was used to identify the type of questionnaire that was to be administered to the households. One out of five households was selected to be interviewed using the long questionnaire, while the other four were interviewed using the short questionnaire. Residents of hotels, hostels and other collective quarters were always interviewed using the long questionnaire. Short questionnaire was also administered on the homeless persons.

Some of the information collected for the region which refers to population sizes, sex and age composition, language, ethnic, religious and marital distributions was collected from all persons covered in the census. However, some other information was collected from only a sample of the population. This refers to disability, education, economic activity, migration, fertility, mortality, and housing stocks and conditions. Even though the above

information was collected from a sample of the population, statistical weights were applied to the information collected in order to let them represent the entire population. This means that the numbers presented in the tables that refer to disability, education, economic activity,... etc. represent the entire population of Amhara Region and not only the sample population.

The fact that the information was collected from a sample of households and not from the entire households does not make the information less reliable. In fact this process increases the quality of the information collected by reducing the work load that would have been faced if all households were covered using the long questionnaires. The reduction of the work load improves the quality of the data because it is expected to facilitate a closer supervision during field work, enable better data coding and editing, and enable the timely processing of the data collected. The census was conducted by enumerators who went from house to house filling in the questionnaires designed for the purpose. Homeless persons were enumerated in the place where they were spending the night.

This report contains two chapters. The first chapter serves as an introduction to the report. Chapter VI presents the housing stocks and conditions in the region. Annex I presents summaries of population sizes for zones, weredas and towns and projected population sizes up to the year 2000. Annex II present the list of tables on other parts of Volume I. The accompanying Volume I: Part I consists of Chapter II which presents the population sizes, sex, age, language, ethnic, religious, marital status and disability condition of the population. Volume I: Part II presents Chapter III which deals with education, and Chapter IV which deals on economic characteristics. Another report entitled Volume I: Part III presents Chapter III which deals on migration, fertility and mortality conditions.

Because of the use of sampling in the collection of some of the information in the census, slight discrepancies between the various tables may be observed. Tables that deal with population size, sex, age, language, ethnic group, religion and marital status refer to the entire population. Tables that deal with disability, education, economic activity, migration, fertility, mortality exclude the homeless. Since the homeless population is very small compared to the population of Amhara Region, the discrepancies are very small. Homeless persons were enumerated using only the short questionnaire because the enumeration took place at night at the place where they were sleeping, and it was not convenient to apply long questionnaires in these situations. The Homeless were not included in the application of the statistical weights.

The tables presented here were selected from a long list of tables that have already been produced for Amhara Region. The forthcoming analytical report for the 1994 Population and Housing Census data of Amhara Region will also present some of these tables. The analytical report will concentrate more on providing indepth analysis rather than providing detailed tabulations. Analysis of the results of the census are expected to continue even after the production of the analytical report.

CHAPTER VI

HOUSING CHARACTERISTICS AND CONDITIONS

The 1994 population and Housing Census included housing questions for urban and rural areas, and information on housing characteristics and conditions were collected for residential and partly residential housing units. The data collected show the housing stock, the quality of the housing unit, the housing facilities and amenities, and the status of tenure and monthly rent of housing units. In this chapter the data on housing units of Amhara Region are presented in Tables 6.1 through 6.24.

In the census a housing unit is defined as a separate and independent place of abode either intended for habitation or not intended for habitation but was occupied as a living quarter by a household at the time of the census. A housing unit may at the time of the census be occupied by one or more households or may be used partly for living and partly for establishment. Different housing questions were employed in the rural and urban parts of Amhara Region. The data on housing collected in the urban areas was relatively very detailed (Appendix II) while those collected in the rural areas was of limited nature (Appendix III). Thus, during the presentation of the results, some tables refer to urban areas only, while some others may refer to both urban and rural areas. A few tables refer to rural areas only.

During the census buildings in which housing units were located were identified as either non-storied or multi storied. The quality of the housing unit is determined by its structure, number of rooms, and density of occupation. Thus, the information collected for each housing unit includes its type of building, type of construction material of walls, roofs, floors, and ceilings which indicated the physical quality of a housing unit. The data on number of rooms per occupied housing unit and number of persons living per room was also collected. Here it must be noted that the averages were calculated for conventional population and

conventional housing units. In the census a room was defined as a space enclosed by walls reaching from the floor to the ceiling or roof at least to a height of two meters and having an area of at least four square meters (i.e. a size large enough to hold a bed for an adult). Except for bath rooms, toilets and passage ways other rooms found in the housing unit were considered as rooms.

In urban areas information on housing facilities and amenities such as bathing, toilet, kitchen, source of water supply, source of power for lighting, type of fuel used for cooking, and availability of radio, television and telephone sets were collected during the census. On the other hand in rural areas information on type of fuel used for cooking, availability of toilet, source of water supply, information on whether there was a separate room in the housing unit that was used mainly as kitchen were collected. A kitchen is defined in the census as a room primarily used for cooking meals but due to lack of adequate rooms or space in the housing unit, some persons or some livestock may also spend the night in the kitchen. In urban areas information on whether a housing unit has traditional or modern type of kitchen was also collected. A modern kitchen is defined as a room that has piped water and sink.

In this chapter data on the status of tenure and monthly rent of housing units is also presented. Tenure refers to the arrangements under which the household occupied its living quarters. A housing unit is said to be owner occupied if it is owned by the occupant household and it is free from rent. A housing unit is considered as rented if the household living in it pays rent to kebele office or to Agency for the Administration of Rented Housing or to the private individuals or to other organizations. There are also housing units occupied by households paying difference in rent. These are households that own another housing unit elsewhere that is rented for a lesser rent compared to the rent of the housing unit the household is occupying.

CHAPTER II - POPULATION SIZE AND CHARACTERISTICS

TABLE 2.1 Total population of zones and weredas by sex, urban and rural: 1994

TABLE 2.2 Total population of towns by sex: 1994

TABLE 2.3A Population size by broad age group, sex and type of residence (Amhara Region-total): 1994

TABLE 2.3B Population size by broad age group, sex and type of residence (Amhara Region-urban): 1994

TABLE 2.3C Population size by broad age group, sex and type of residence (Amhara Region-rural): 1994

TABLE 2.4 Population size of zones by sex and type of residence, urban and rural: 1994

TABLE 2.5 Household size and average number of persons per household in conventional households by zones, urban and rural: 1994

TABLE 2.6 Population size by sex and age in single year, urban and rural: 1994

TABLE 2.7 Population size of weredas by sex and age group, urban and rural: 1994

TABLE 2.8 Population size of towns by sex and age group: 1994

TABLE 2.9 Population size by ethnic group and sex, urban and rural: 1994

TABLE 2.10 Five major ethnic groups of weredas by sex, urban and rural: 1994

TABLE 2.11 Five major ethnic groups of towns by sex: 1994

TABLE 2.12 Population size by mother tongue and sex, urban and rural: 1994

TABLE 2.13 Five major mother tongues of weredas by sex, urban and rural: 1994

TABLE 2.14 Five major mother tongues of towns by sex: 1994

TABLE 2.15 Population size by second language spoken and sex, urban and rural: 1994

TABLE 2.16A Population size by religion, sex and age group (Amhara Region-total): 1994

TABLE 2.16B Population size by religion, sex and age group (Amhara Region-urban): 1994

TABLE 2.16C Population size by religion, sex and age group (Amhara Region-rural): 1994

TABLE 2.17 Population size of weredas by religion and sex, urban and rural: 1994

TABLE 2.18 Population size of towns by religion and sex: 1994

TABLE 2.19A Population in conventional households by relationship to head of household, sex and age group (Amhara Region-total): 1994

TABLE 2.19B Population in conventional households by relationship to head of household, sex and age group (Amhara Region-urban):1994

TABLE 2.19C Population in conventional households by relationship to head of household, sex and age group (Amhara Region-rural):1994

TABLE 2.20A Population aged ten years and over by marital status, sex and age group (Amhara Region-total): 1994

TABLE 2.20B Population aged ten years and over by marital status, sex and age group (Amhara Region-urban):1994

TABLE 2.20C Population aged ten years and over by marital status, sex and age group (Amhara Region-rural): 1994

TABLE 2.21 Population by broad age groups, disability status, type of disability and sex ratio: 1994

TABLE 2.22 Population by disability status and type of disability, urban and rural: 1994

ANNEX I - POPULATION PROJECTIONS

TABLE ANNEX I.1 Reported population size of Amhara Region by urban and rural areas October 11, 1994 census

TABLE ANNEX I.2 Population projection of Amhara Region by rural-urban, five years age group and sex, 1995 - 2000

ANNEX II - POPULATION SIZE OF KEBELES

TABLE ANNEX II.1 Total population of kebeles by sex, urban areas: 1994

TABLE ANNEX II.2 Total population of farmers' associations by sex, rural areas: 1994

VOLUME I: PART II

CHAPTER III - EDUCATIONAL CHARACTERISTICS

TABLE 3.1A Population aged five years and over by status of school attendance, age and sex (Amhara Region-total): 1994

TABLE 3.1B Population aged five years and over by status of school attendance, age and sex (Amhara Region-urban): 1994

TABLE 3.1C Population aged five years and over by status of school attendance, age and sex (Amhara Region-rural): 1994

TABLE 3.2 Population of zones aged five years and over by status of school attendance, sex, urban and rural: 1994

TABLE 3.3A Population aged five years and over currently attending school by level, age and sex (Amhara Region-total): 1994

TABLE 3.3B Population aged five years and over currently attending school by level, age and sex (Amhara Region-urban): 1994

TABLE 3.3C Population aged five years and over currently attending school by level, age and sex (Amhara Region-rural): 1994

TABLE 3.4 Population of zones aged five years and over currently attending school by level, sex, urban and rural :1994

TABLE 3.5 Gross and net enrolment ratios in primary, junior and senior secondary school for weredas: 1994

TABLE 3.6A Population aged ten years and over by literacy status, highest grade completed and sex (Amhara Region-total): 1994

TABLE 3.6B Population aged ten years and over by literacy status, highest grade completed and sex (Amhara Region-urban): 1994

TABLE 3.6C Population aged ten years and over by literacy status, highest grade completed and sex (Amhara Region-rural): 1994

TABLE 3.7 Population of weredas aged ten years and over by literacy status, highest grade completed (grouped), percent literate, sex, urban and rural: 1994

TABLE 3.8 Population of towns aged ten years and over by literacy status, highest grade completed (grouped), percent literate and sex: 1994

CHAPTER IV - ECONOMIC ACTIVITY STATUS

TABLE 4.1A Population aged ten years and over by age group, sex, activity status and rate (Amhara Region-total): 1994

TABLE 4.1B Population aged ten years and over by age group, sex, activity status and rate (Amhara Region-urban): 1994

TABLE 4.1C Population aged ten years and over by age group, sex, activity status and rate (Amhara Region-rural): 1994

TABLE 4.2 Population of zones aged ten years and over by sex, activity status and rate, urban and rural 1994

TABLE 4.3 Population of towns aged ten years and over by sex, activity status and rate 1994

TABLE 4.4A Economically non-active population aged ten years and over by age group, sex and reason for not working (Amhara Region-total): 1994

TABLE 4.4B Economically non-active population aged ten years and over by age group, sex and reason for not working (Amhara Region-urban): 1994

TABLE 4.4C Economically non-active population aged ten years and over by age group, sex and reason for not working (Amhara Region-rural): 1994

TABLE 4.5A Unemployed population aged ten years and over by sex and age group (Amhara Region -total): 1994

TABLE 4.5B Unemployed population aged ten years and over by sex and age group (Amhara Region -urban): 1994

TABLE 4.5C Unemployed population aged ten years and over by sex and age group (Amhara Region -rural): 1994

TABLE 4.6 Unemployed population of zones aged ten years and over by sex, urban and rural): 1994

TABLE 4.7 Unemployed population of towns aged ten years and over by sex: 1994

TABLE 4.8A Unemployed population aged ten years and over by age group, sex and educational level (Amhara Region-total): 1994

TABLE 4.8B Unemployed population aged ten years and over by age group, sex and educational level (Amhara Region-urban): 1994

TABLE 4.8C Unemployed population aged ten years and over by age group, sex and educational level (Amhara Region-rural): 1994

TABLE 4.9A Economically active population aged ten years and over by age group, sex and employment status (Amhara Region-total): 1994

TABLE 4.9B Economically active population aged ten years and over by age group, sex and employment status (Amhara Region-urban): 1994

TABLE 4.9C Economically active population aged ten years and over by age group, sex and employment status (Amhara Region-rural): 1994

TABLE 4.10A Economically active population aged ten years and over by age group, sex and major occupational groups (Amhara Region-total): 1994

TABLE 4.10B Economically active population aged ten years and over by age group, sex and major occupational groups (Amhara Region-urban): 1994

TABLE 4.10C Economically active population aged ten years and over by age group, sex and major occupational groups (Amhara Region-rural): 1994

TABLE 4.11 Economically active population aged ten years and over by sex and minor occupational groups (Amhara Region-total): 1994

TABLE 4.12A Economically active population aged ten years and over by age group, sex and major industrial divisions (Amhara Region-total): 1994

TABLE 4.12B Economically active population aged ten years and over by age group, sex and major industrial divisions (Amhara Region-urban): 1994

TABLE 4.12C Economically active population aged ten years and over by age group, sex and major industrial divisions (Amhara Region-rural): 1994

TABLE 4.13 Economically active population aged ten years and over by sex and minor industrial groups (Amhara Region-total): 1994

TABLE 4.14 Employed population of zones in urban areas aged ten years and over by sex and number of days worked: 1994.

ANNEX I - SUMMARY OF POPULATION SIZES

ANNEX TABLE 1 Total population of zones and weredas by sex, urban and rural: 1994

ANNEX TABLE 2 Total population of towns by sex: 1994

ANNEX TABLE 3 Population size by sex and age in single year, urban and rural: 1994

ANNEX TABLE 4 Population projection of Amhara Region by rural-urban, five years age group and sex, 1995 - 2000

VOLUME I: PART III

CHAPTER V - MIGRATION, FERTILITY AND MORTALITY

A - MIGRATION

TABLE 5.1A Population by age group, sex, migration status and area of previous residence (Amhara Region-total): 1994

TABLE 5.1B Population by age group, sex, migration status and area of previous residence (Amhara Region-urban): 1994

TABLE 5.1C Population by age group, sex, migration status and area of previous residence (Amhara Region-rural): 1994

TABLE 5.2A Population of zones by sex, migration status and area of previous residence, urban and rural: 1994

TABLE 5.2B Population of towns by sex, migration status and area of previous residence (Amhara Region):1944

TABLE 5.3A Migrant population by age group, sex and length of residence (Amhara Region-total): 1994

TABLE 5.3B Migrant population by age group, sex and length of residence (Amhara Region-urban): 1994

TABLE 5.3C Migrant population by age group, sex and length of residence (Amhara Region-rural): 1994

TABLE 5.4A Migrant population of zones by sex and length of residence, urban and rural):1994

TABLE 5.4B Migrant population of towns by sex and length of residence (Amhara Region): 1994

B - FERTILITY

TABLE 5.5A Summary measures of fertility based on reported data for zones, Amhara: 1994

TABLE 5.5B Summary measures of fertility based on reported data for towns that have 10,000 and above persons, Amhara: 1994

TABLE 5.6A Women of child bearing age by age group, number of children born alive during the last twelve months, age specific fertility rate and total fertility rate, urban and rural: 1994

TABLE 5.6B Women of child bearing age by age group, number of children born alive during the last twelve months, age specific fertility rate and total fertility rate for major urban centers (with 10,000 or more inhabitants): 1994

TABLE 5.7 Women aged 10 years and over by age group, number of children everborn and mean number of children ever born: 1994

MORTALITY

TABLE 5.8A Estimated infant and child mortality rates derived by Trussell method and implied by the west Coale and Demeny model Life Table for zones, Amhara Region 1994

TABLE 5.8B Estimated infant and child mortality rates derived by Trussell method and implied by the west Coale and Demeny model Life Table for towns with population size of 10,000 and above persons, Amhara Region: 1994

Statistical data that reflect the socio-economic and demographic conditions of the residents of a country are useful for designing and preparation of development plans and for monitoring and evaluation of the impact of the implementation of the development plans. These statistical data include population size, age, sex, fertility, mortality, migration, literacy and education, marital status, occupation, industry, housing stocks and conditions, ...etc. In order to fill the gap for these socio-economic and demographic data need, Ethiopia conducted its second National Population and Housing Census in October, 1994.

The 1994 Population and Housing Census of Ethiopia was conducted under the auspices of the Population and Housing Census Commission that was set up under Proclamation No. 32/1992. The Commission was chaired by the Prime Minister and the members of the commission were drawn from various relevant ministries. The Central Statistical Authority served as the Office of the Commission (Secretariat). Hence the processing, evaluation and analyses of the data collected in this census as well as its dissemination are the responsibilities of this office. As stated above the census was conducted in October 1994 and the resulting data are processed and evaluated. Volume I of the census report presented the Statistical Reports for Amhara Region which appeared in four separate parts:

Volume I: Part I - Statistical Report on Population size and Characteristics.
Volume I: Part II - Statistical Report on Education and Economic Activity.
Volume I: Part III- Statistical Report on Migration, Fertility and Mortality.
Volume I: Part IV - Statistical Report on Housing Characteristics.

The Abridged Statistical Report contains the major statistical tables presented in Parts I, II, III and IV. The tables presented in the Abridged Statistical Report are limited

CHAPTER I

INTRODUCTION

This chapter presents an overview of the content of the census report " The 1994 Population and Housing Census of Ethiopia: Results for Amhara Region, Volume I: Part V- Abridged Statistical Report". This report presents information (mainly at zonal level) on population sizes; ethnic, language, religious, marital and type of disability; educational levels and characteristics; economic activity (activity rates, unemployment rates, occupational distribution, industrial groups); migration, fertility; mortality and housing. Projections of population sizes up to the year 2000 are also presented. The above information is presented in more detail (mainly at wereda and town levels) in Parts I to IV of the Statistical Report. Therefore, users who are interested in more detailed information (particularly at wereda and town levels) will need to make use of Parts I to IV rather than the Abridged Statistical Report. These detailed Statistical reports are: Volume I: Part I-Statistical Report on Population Size and Characteristics; Volume I: Part II- Statistical Report on Education and Economic Activity; Volume I: Part III- Statistical Report on Migration, Fertility and Mortality; and Volume I: Part IV - Statistical Report on Housing Characteristics. The data presented in these reports constitute the major statistical tables that are essential to planners, administrators, researchers and other data users. The analytical report of the results of the census for Amhara Region will be presented in a separate report, and will deal with indepth analyses of the results.

Amhara Region consists of ten zones and one special zone i.e. Bahir Dar; 106 weredas, and 208 towns. The rural part of the region has 4,980 farmers association areas, while the urban part has 337 kebeles in the 208 towns. Localities were identified as towns or rural areas during the census cartographic work. Towns were defined as localities in which Urban Kebele Administration (previously known as Urban Dwellers Association) has been established. Localities that had 1000 or more persons

whose inhabitants were primarily engaged in non-agricultural activities were identified as towns irrespective of whether Urban Kebele Administration has been established or not. Similarly capitals of weredas were also identified as towns even if Urban Kebele Administration has not been established. However, changes of wereda boundaries have occurred since the conduct of the census cartographic work; and in some instances two or more previous weredas have been combined to form one new wereda. Thus, localities that were seats of wereda administration at the time of the census cartographic work, and subsequently identified as towns in the census report, may no longer be wereda capitals.

The 1994 Population and Housing Census was the second national population and housing census ever to be conducted in the country. The first population and housing census was conducted in May 1984. The Second Population and Housing Census of Ethiopia was conducted beginning 11 October, 1994 and was completed in most areas within the following ten days. Eleventh of October, 1994 was used as the census day. The questionnaires used for the census were prepared in Amharic. English translations of the questionnaires used in the census are presented at the end of the report. The types of questionnaires used were:

i) Short Questionnaire (Appendix I)
ii) Long Urban Questionnaire (Appendix II)
iii) Long Rural Questionnaire (Appendix III)

The content of the short questionnaire was similar in urban and rural areas. The questionnaires were filled-in by enumerators who went from one household to the next. All members of the household were recorded on the same questionnaire. The short and the long questionnaires differed on the number of variables collected. The short questionnaire collected basic data on population such as population sizes, sex, age, language, ethnic group, religion, and marital status. In addition to these, the long questionnaire included data on disability, education, economic activity, migration, fertility, mortality, and housing stocks and conditions.

The type of questionnaire administered to each household was determined by using a systematic sampling selection procedure. During the three days before the census day all households, and housing units were listed in a separate form designed for the purpose. This list was used to identify the type of questionnaire that was to be administered to the households. One out of five households was selected to be interviewed using the long questionnaire, while the other four were interviewed using the short questionnaire. Residents of hotels, hostels and other collective quarters were always interviewed using the long questionnaire. Short questionnaire was also administered on the homeless persons.

Some of the information collected for the region which refers to population sizes, sex and age composition, language, ethnic, religious and marital distributions was collected from all persons covered in the census. However, some other information was collected from only a sample of the population. This refers to disability, education, economic activity, migration, fertility, mortality, and housing stocks and conditions. Eventhough the above information was collected from a sample of the population, statistical weights were applied to the information collected in order to let them represent the entire population. This means that the numbers presented in the tables that refer to disability, education, economic activity,... etc. represent the entire population of Amhara Region and not only the sample population.

The fact that the information was collected from a sample of households and not from the entire households does not make the information less reliable. In fact this process increases the quality of the information collected by reducing the work load that would have been faced if all households were covered using the long questionnaires. The reduction of the work load improves the quality of the data because it is expected to facilitate a closer supervision during field work, enable better data coding and editing, and enable the timely processing of the data collected. The census was conducted by enumerators who went from house to house filling-in the questionnaires designed for the

purpose. Homeless persons were enumerated in the place where they were spending the night.

This report contains seven chapters. The first chapter serves as an introduction to the report. Chapter II presents the population sizes, sex, age, language, ethnic, religious, and marital status distributions of the population. It also provides the disability condition in Amhara Region. Chapter III presents the Educational Characteristics of the population and Chapter IV deals with the Economic Characteristics of the population in the region. Chapter V deals with Migration, Fertility and Mortality conditions and Chapter VI on Housing Characteristics in Amhara Region. Chapter VII presents population projection up to the year 2000, and Annex I presents the list of tables that appear on other parts of Volume I.

The accompanying Statistical reports present more detailed information (mainly at wereda and town levels) and appear in four separate parts. Volume I: Part I consists of Chapter II which presents the population sizes, sex, age, language, ethnic, religion, marital status and disability condition of the population. Volume I: Part II presents Chapter III which deals with education, and Chapter IV which deals on economic characteristics. Volume I: Part III presents Chapter V which deals on migration, fertility and mortality conditions; and Volume I: Part IV presents Chapter VI which deals on housing stocks and conditions.

Because of the use of sampling in the collection of some of the information in the census, slight discrepancies between the various tables may be observed. Tables that deal with population size, sex, age, language, ethnic group, religion and marital status refer to the entire population. Tables that deal with disability, education, economic activity, migration, fertility, and mortality exclude the homeless. Since the homeless population is very small compared to the population of the Amhara Region, the discrepancies are very small. Homeless persons were enumerated using only the short questionnaire because the enumeration took place at night at the place where they were

sleeping, and it was not convenient to apply long questionnaires in these situations. Homeless persons were not included in the application of the statistical weights.

The tables presented here were selected from a long list of tables that have already been produced for the Amhara Region. The forthcoming analytical report for the 1994 Population and Housing Census data of the Amhara Region will also present some of these tables. The analytical report will concentrate more on providing indepth analysis rather than providing detailed tabulations. Analysis of the results of the census are expected to continue even after the production of the analytical report.

CHAPTER II

POPULATION SIZE AND CHARACTERISTICS

This chapter presents data on population size for Amhara Region at zone and wereda levels classified into rural and urban areas and at town levels. Also presented are tables that deal on the characteristics of the Amhara population, which appear mainly at zone levels, but limited to the region in certain instances. These tables present information on population sizes by age, sex, type of residence, household size, ethnic group, language, religion, relationship to head of the household, marital status and disability. The chapter consists of various tables which are self-explanatory. However, short definitions of some important terms and concepts used in the chapter are provided.

In this chapter, Table 2.1 presents population size of Amhara Region by sex classified into urban and rural areas. Population size of towns is provided in Table 2.2. According to the 1994 Census, the population of Amhara Region was found to be 13,834,297 of which 6,947,546 were males and 6,886,751 were females. The population sizes refer to the de jure population size of Amhara Region as of 11 October, 1994. De jure population comprises of all the people who "belong" to a given area at a given time by virtue of usual residence (Shryock et al., 1973). In the census a person is said to be a usual resident of a household (and hence an area) if he/she has been residing in the area continuously for at least six months before the census day or intends to reside in the area for six months or longer. Thus, visitors are not included with the usual population. Homeless persons were enumerated in the place where they were spending the night. The 1994 Census includes foreign nationals who were residing in the region. On the other hand all Ethiopians living abroad were not counted.

Tables 2.3A - 2.3C classify population size by broad age group and type of residence and Table 2.4 shows population size of zones by sex and type of residence. Type of residence is

categorized into two major groups, namely, conventional and non-conventional. Respondents who live in the same housing unit and have common cooking arrangements (eat their food together) are said to be residing in conventional households. The non-conventional population in turn is sub-divided into residents of collective quarters (hotel/hostel and other collective quarters) and the homeless. A collective quarter is a housing unit, a building, or a compound in which a number of unrelated persons reside together and share common facilities e.g. boarding schools, prisons, hotels, hostels,... etc. Homeless persons refer to individuals without any fixed residence.

The distribution of the number of members per household for the population living in conventional households of zones is given in Table 2.5. A household often consists of the head, the spouse, their children and some other persons residing in the household. A person is considered to be a member of a household if he has the same cooking arrangement with the other members.

The population size of Amhara Region by single years of age and sex is presented in Table 2.6, while Table 2.7 provides the five year age group and sex distribution of the population for zones. During the census, age of respondents was registered in completed years. Enumerators used several probing questions to get exact ages from respondents who did not know their exact ages.

Ethnic identity of a person is traced through his/her national or tribal origin. To assist the enumerators in recording the information, detailed list of the ethnic groups in the country, obtained from The Institute of Nationalities Study, was provided in the census enumerators' manual. In this report ethnic groups are listed down in alphabetical order, except where indentation is used to present related ethnic groups next to one another. For example the Kembata, Alaba and Kebena are related ethnic groups. For this reason all these ethnic groups are presented next to one another. To indicate that these are related ethnic groups, the names Alaba and Kebena appear indented in the list below the name Kembata. The selection regarding which ethnic

group will appear indented in the table does not imply that one ethnic group is dominant over the others. All the ethnic groups are treated independently and separate figures are presented for each. The size of each ethnic group residing in Amhara Region is presented in detail in Table 2.8.

In the 1994 Census mother tongue is defined as the language used by the child for communication with his family members or guardians during childhood. Whereas second language is additional language used by the respondent. If the respondent uses more than one additional language, the one that is used more frequently is recorded. Similar to the previous table, indentation is used to present related language groups one after another. Table 2.9 presents the detailed distribution of all mother tongues spoken in the region.

Religion is presented under four major groups; namely, Christian, Muslim, Others and Traditional. Christian is further sub-divided into Orthodox, Protestant and Catholic. Orthodox Christianity includes the Kibat and Tsega while Seven Day Adventist, Pentecost, Lutheran, Baptist, Anglican, Presbyterian, Meserete Kirstos, Mulu Wengel, Kale Hiywot...etc. are presented as Protestants. Hindus, Jews, Behais, Johovas, Atheists,...etc. fall under the "others" category. Table 2.10 presents the religious distribution of the population by sex for zones.

The 1994 census has also collected information on members of the household and their relationship to the head. The head of the household is any member of the household who is recognized as a head by the members. In a polygamous marriage where the wives have separate households, the husband is considered to be the head of the household of the first wife. The other wives or other members (eg. elder son) are considered to be the heads of their respective households. The data on relationship to the heads of conventional households is presented in Tables 2.11A - 2.11C.

Marital status of the population aged ten years and over by age group and sex is presented in Table 2.12A - 2.12C. Marital

status is presented in four major groups; namely, single, married, divorced, and widowed. A person who had never been married is considered to be single; married persons include couples who are living together bonded by any kind of marital engagement at the time of the census (Traditional, Church, or Municipality); separated couples are also considered to be married unless they had dissolved their marriage agreement. Any body who had been married but whose marriage was dissolved before the census day is categorized as divorced. A person who has not married again after the death of a spouse is categorized as widowed.

Table 2.13 presents disability status and type of disability by broad age groups and sex for the region. Note that figures in these tables exclude the homeless. In the census a disabled person was defined as one who, due to physical or mental injuries, could not fully perform activities that other healthy persons could do. This represents decrease or loss of ability to discharge various social or economic functions. Disability is presented under ten major groups, namely; i) totally blind ii) partially blind (one whose eyes could only see partially or one who is blind on one eye); iii) hearing problems (totally deaf or partially deaf); iv) hearing and speaking problems; v) leg problems (lame, amputated or crippled); vi) hand/arm problems; vii) leprosy; viii) mental problems (epilepsy, madness, mental retardation, melancholia...etc); ix) other types of disability (different from what is specified above); and x) multiple disability (with two or more physical defects mentioned above). At the end of this chapter, projected population size of Amhara region is presented in Annex I.

CHAPTER III

EDUCATIONAL CHARACTERISTICS

This chapter presents data on educational characteristics of the population of Amhara Region . The data was collected from members of the sampled household. Two questions on education were included in the census questionnaire to measure school attendance and educational attainment. The information was collected from persons who were covered using the long questionnaire. However, the information has been weighted and all the figures in this chapter refer to the entire population of Amhara Region.

Every person aged five years and over in a sampled household was asked to report his/her educational status. The three alternative answers given were (1) attending school during the census year, (2) attended school in the past and left during the census year and (3) never attended. The resulting data on school attendance for zones classified by urban and rural areas is given in Table 3.1.

Those who were attending school during the census year were further asked to indicate the grade in which they were attending. This data was compiled to produce gross and net enrollment ratios. These measures are essential to measure the proportion of students out of the school age population.

Gross enrollment ratio in primary education is defined as the ratio of students in primary education divided by total number of children aged 7-12 years (multiplied by 100 percent). Gross enrollment ratio in junior secondary education is the number of students in junior secondary education divided by total children aged 13-14 years (multiplied by 100 percent). Gross enrollment ratio in senior secondary education is the number of students in senior secondary education divided by total children aged 15-18 years (multiplied by 100 percent). The gross enrollment ratios for primary, junior and senior secondary levels for zones classified by

urban and rural areas are presented in Table 3.2. Enrollment ratios that exceed 100 indicate enrollment of over-aged children in each level. Since this ratio does not consider the age distribution of the enrolled population the net enrollment ratio was calculated.

Net enrollment ratio in primary education is defined as students in primary education aged 7-12 years divided by total children aged 7-12 years (multiplied by 100 percent). Net enrollment ratio in junior secondary education is defined as students in junior secondary education aged 13-14 years divided by total children aged 13-14 years (multiplied by 100 percent). Net enrollment ratio in senior secondary education is the number of students in senior secondary education aged 15-18 years divided by total children aged 15-18 years (multiplied by 100 percent). The net enrollment ratios for zones are presented in Table 3.2.

Data on educational attainment is also given in this chapter. Those who were attending school during the census day and attended in the past and left school prior to the census day were asked to state whether they were literate or not. If literate, respondents were further enquired to report the highest grade completed in the formal education system. Following the recommendation of the United Nations that states age of 10 years as the minimum age for compiling and analyzing data on educational attainment, Table 3.3 presents data on educational attainment for the population aged 10 years and over for zones.

The report in general and this chapter in particular refers to formal education only. "A formal education is defined as education in which students are enrolled or registered regardless of the mode of teaching used. It includes both 'regular school and university education' and 'adult education'. All regular schools and university education is essentially formal. Adult education, however, can be formal and non-formal. The 1994 population and housing census covered only the formal component of the adult education and all regular and university education.

Regular and University education is used to describe the system that provides a 'ladder' by which children and young people may progress from primary schools through universities (although many drop out on the way). Adult education is used to describe out-of-school education, which provides education for people who are not in the regular school and university system and who are generally fifteen or older (although in some circumstances, younger students are accommodated along with their older colleagues)" (United Nations, 1976).

CHAPTER IV

ECONOMIC ACTIVITY STATUS

In the 1994 population and housing census, information on economic activity status was collected for all persons aged ten years and over using the long questionnaire. The long questionnaire was administered only on selected households. The selection was done on the basis of systematic sampling and covered one fifth of the total households. However, statistical weights were later applied which makes the figures presented in this chapter to refer to the entire population. Information on economic activity collected in the census was:

a) whether engaged in productive work during the reference period.
b) reason for not being engaged in productive work during the reference period (for those who were not so engaged).
c) major type of occupation.
d) major product or service of the establishment or industry.
e) employment status in the main activity.
f) number of days worked during the last seven days for those engaged in productive work (for urban areas only).

The approaches used in the collection of the above information in urban and rural areas were different. The current status approach was employed in the urban areas, while the usual status approach was used in the rural areas. The main difference between the two approaches is in the length of the reference period. The current status approach is based on a short reference period, which in this case is the seven days before the census day. On the other hand, the usual status approach has a long reference period, that is, the twelve months before the census day.

In urban areas all persons aged ten years and over who were productively engaged for at least one day during the seven days reference period were classified as economically active. In rural areas all persons aged ten years and over were classified to be

participating in a productive activity if they were engaged in the production of economic goods and services during most of the twelve months prior to the census day. For those engaged in agricultural activities, persons who were engaged in agricultural and related work during most of the main agricultural season were classified to be economically active.

Economic or productive activity in the census was defined in terms of production of goods and services following the concepts presented in the United Nations System of National Accounts (SNA) production boundary (ILO, 1990a). Economic activity is defined as work which involves the production of goods or services for sell or exchange for other commodities including:- production and processing of primary products (agriculture, hunting, fishing, forestry and logging, and mining and quarrying) for own consumption, own account construction and fixed asset formation (expected life use of one year or more) for own use. Such activities could be performed for an individual, family or private enterprise, government establishment or public organization. The remuneration may be on daily, monthly, yearly or contract basis. However the activities of apprentices are considered as productive activity. On the other hand, unpaid household chores such as preparing food, cleaning the house, taking care of children or collecting firewood are not considered to be productive activities. In addition unpaid community and volunteer services and prostitution are classified as non-economic activities.

Economically Active and Non-active Population

The economically active population comprises all persons aged ten years and over who were employed and unemployed. The employed population consists of those who were engaged in productive activity for at least one day during the seven days prior to the census day for urban areas and most of the twelve months prior to the census day for rural areas. Persons who had regular jobs but did not work during the reference period because of poor health, social reason, seasonality of work, annual leave or due to temporary closure of establishment were included as

employed persons. The unemployed population consists of those who were not working during the reference period and were actively looking for work or were discouraged job seekers, that is, those who were not actively looking for work but were ready and willing to take up a job if one was available. A person who is looking for work but was engaged in a productive activity during the reference period is recorded as economically active and not as an unemployed person. The number of economically active and the non-active population of zones by sex and urban/rural residence is presented in Table 4.1. The table also presents activity rates which are defined as the percentage of the economically active over the total of the active plus the non-active population. The distribution of the unemployed population of zones by sex and urban/rural residence is presented in table 4.2. The unemployment rate which is defined as the ratio of the unemployed population over the economically active population is included in the table.

Type of Activity

Employed persons were asked about the type of occupation, and major product or industrial group of the establishment in which they were engaged during the reference period and the status of their employment. This information was also collected from unemployed persons who had previous work experience. The information collected from these persons referred to the job they held before they became unemployed. The information on type of activity was not collected from unemployed persons with no previous work experience. Therefore, analysis of economically active population by occupation, major product or type of service of their establishment and status will be based on a number fewer than the total economically active persons by the number of employed persons who never had any work experience.

A national occupation and industrial classification code list was prepared for the census. The list prepared closely followed the International Standard Classifications of Occupation (ILO,1990b) and International Standard Industrial Classification (UN, 1990) but took into account the prevailing national socio-

economic conditions. These classifications were used for coding the responses on occupation and the type of industrial group of the establishment.

The distribution of the economically active population of zones by the major occupational groups, sex and urban/rural residence appear in Table 4.3. Similarly, distribution of the economically active population of zones by major industrial divisions, sex and urban/rural residence is presented in Table 4.4.

CHAPTER V

MIGRATION, FERTILITY, AND MORTALITY

The previous chapters in this volume dealt on the description of the characteristics of the population. Part III deals with the changes (dynamics) that are occurring in the population. These are migration, fertility and mortality. The first section deals with migration and it will be followed by fertility and mortality.

A. MIGRATION

Information on migration of a population is of direct interest to planning and implementing agencies as well as academic institutions, because migration has a direct effect on the geographic distribution of the population. Moreover, migration has an interaction with other demographic forces as well as other aspects of social and economic changes. In recognition of the importance of this variable as one of the components of population change, data on migration was collected in the 1994 Population and Housing Census of Ethiopia.

In the 1994 census, two migration related questions were employed. These were: " Length of continuous residence" and "Place of previous residence". The former question provides information on the timing of migration while the later provides information on area of origin.

The "length of residence" of each person refers to the number of years the person has been continuously residing in a town or rural part of the wereda of enumeration. The length of stay was recorded in completed years.

In the census, information on length of residence was collected differently in the urban and rural parts of the country. The question asked in the urban areas referred to the number of years the person has been continuously residing in the town. In the rural areas, the question referred to the number of

years the person has been continuously residing in the rural parts of the wereda of enumeration.

Thus, in the urban areas a person who was born in a given town and has been continuously residing there is considered as a non-migrant. However, if the person was born in another town or any rural part of the country, then, he/she is considered as a migrant. Similarly, a person who was born in the town of enumeration but at one time or another resided in a different town or a rural area and has returned to the town of enumeration is considered as a migrant(return migrant).

In the rural areas, a person who was born in a rural area of wereda of enumeration and has been continuously residing there is considered as a non-migrant. However, if the person was born in a rural part of another wereda or any town , then, he/she is considered as a migrant. Similarly, a person who was born in the rural part of the wereda of enumeration but at one time or another resided in a rural part of a different wereda or any town and has returned to the rural part of the wereda of enumeration, is considered as a migrant(return migrant).

The "area of previous residence" refers to the area where the migrant has been residing before he/she migrated to the area of enumeration. In the census, the " area of previous residence" of migrants was recorded as "rural" or "urban" if the person has migrated from rural or urban areas, respectively. This enables the classification of all migrants as migrants from rural or urban areas.

This section presents the main findings based on the two migration related questions discussed above for Amhara region. Table 5.1 presents population by sex, migration status, area of previous residence of migrants and area of enumeration (zones, urban, rural). Table 5.2 presents in-migrants by sex, length of residence in the area of enumeration (zones, urban and rural). The length of residence classifications used were less than one year, one year, two years, three years, four years, 5-6 years, 7-9 years and 10 years and above.

B. **FERTILITY**

This section presents the fertility level of the population of Amhara Region. In the 1994 Population and Housing Census Questionnaire information was collected on both current and retrospective fertility from every woman aged 10 years and over.

Data on current fertility was obtained by asking, "Did you have a live birth during the last twelve months prior to the census day?." Information on retrospective fertility was obtained by asking about the total number of children ever born alive, number of children living at home, number of children living elsewhere, and number who had died up to the census day.

Generally, data on current and retrospective fertility collected in censuses of developing countries are not usually free from error. Data on total number of children ever born may also be distorted due to recall-lapse and socio-cultural factors, above all, because of the extended family system in the country, the women are likely to include relatives with their own. Again, the various social practices associated with birth of small babies, especially those births that end in early death are likely to have been omitted from reporting. Another source of error in the reported number of children could be the inclusion of still births. These probable errors should be borne in mind while interpreting reported fertility measures presented in this section.

Reported Current Fertility

Based on the question asked about number of births given in the year preceding the census day, reported fertility measures were computed and presented in Table 5.3 for each zone and 5.4 for each town with population size of 10,000 and over. The measures include Crude Birth Rate (CBR), General Fertility Rate (GFR) and Total Fertility Rate (TFR).

The Crude Birth Rate refers to the total number of births occurring in a given year per 1000 mid-year population. The

General Fertility Rate is defined as the number of births occurring in a given year per 1000 women in the reproductive ages (i.e. women aged 15-49).

The other fertility parameter which takes into account the age structure of the population is what is known as Total Fertility Rate (TFR). Total Fertility Rate refers to the number of children a woman is likely to reproduce at the end of her reproductive period given the current age-schedule of fertility rate. Reported total fertility rate for Amhara Region is about 4.3 children per woman. The corresponding figure in urban and rural areas of Amhara Region were 2.7 and 4.5 respectively.

The above mentioned fertility measures indicate only the level of fertility. Table 5.5 gives the number of women and births by age and the corresponding age specific fertility rate-ASFR (the ratio of births to women in each age group). The age specific fertility rates reveal that about 64.5 percent of the total births given in the year preceding the census day are born by women in the age group 20-34. The women in the early twenties (20-24) and thirties (30-34) and late twenties (25-29) are the most fertile. The observed pattern of fertility by age group holds true for both urban and rural areas.

The analysis on current fertility excludes women who did not state number of births they had during the 12 months before the census day. Hence the number of women in the various age groups in this table may not be consistent with other figures in the report.

Cumulative Fertility

The other fertility index of interest is the mean number of children ever born presented in Table 5.6 for the total, rural and urban areas of the region. Completed fertility is imputed from data on number of children ever born by women aged 45-49 years. Comparison of the mean number of children ever born at age group 45-49 and TFR, revealed a difference of one and a half child for total and rural areas, and about 2.7 children for

urban areas. This pronounced difference in the urban areas (about 3 children) may indicate that fertility is declining recently in the urban areas of the region.

The fertility measures reported in this section are all reported levels. No attempt has been made to make adjustments to the levels of fertility. Detailed analysis of the level of fertility will be made in the analytical report that will be forthcoming soon.

C. MORTALITY

For the analysis of mortality only one type of information was collected in the 1994 Population and Housing Census. The question was addressed to women in their reproductive ages and referred to the total number of children ever born and the number surviving. To get the data, all women aged 10 years and over were asked the total number of sons and daughters they ever gave birth to, the total number living at home, and the total number living elsewhere and the total number that died. This information was then utilized to provide estimates of infant and under-five mortality and expectation of life at birth. These mortality indicators are defined as follows:

Infant mortality ($1q_0$): the probability of dying between birth and age one per 1000 live births in a given year.

Under-five mortality ($5q_0$): the probability of dying between birth and age five per 1000 live births.

Expectation of life at birth (e°_0): refers to the average number of years a new born baby is expected to live if he/she is exposed throughout its life to the prevailing pattern of age specific death rates.

In order to estimate these mortality indices the Trussell Variant of the Brass Indirect Technique (UN, 1983) was employed and the West Family of the Coale and Demeny Model Life Tables were selected as the standard pattern of mortality. But the reliability of indirect estimates based on children ever born and surviving data highly depend on the quality of reporting of children ever born, children dead and age of women. Thus, any bias in the reporting of these data might lead to over or under estimation of mortality. In the census the proportion of women in the reproductive age (15-49 years) who did not report their parity and number of children dead were not very high, being 1.2 percent for the Amhara Region. For this reason, these women were

totally discarded from the analysis. Furthermore, it should be noted that since the estimates based on reports of women aged 20-34 have been proven to be relatively accurate than the estimates of younger and older women, infant and child mortality rates provided were an average of the three age groups, namely 20-24, 25-29 and 30-34.

Infant and under-five mortality estimates along with the corresponding life expectancies at birth for Amhara Region and its rural and urban sub-divisions are presented in Table 5.7. Also similar estimates are presented in Table 5.8 for urban centers that have population sizes of 10,000 and above persons. The data indicate an infant mortality rate of 116 per thousand live births and under five mortality rate of 170 for the Region. The expectation of life at birth for Amhara Region was found to be 50.8 years for both sexes, 49.6 years for males and 52.2 years for females. The data in Table 5.9 provides the distribution of number of children ever born and number surviving, by age group of women as reported during the census. This table was the basis on which the estimated levels of mortality were derived for the region. More detailed analysis of the levels of mortality will be presented in the indepth Census Analytical Report of Amhara Region that will be forthcoming.

NOTE: Women who did not state number of children ever born or number of children surviving are omitted from the table.

CHAPTER VI

HOUSING CHARACTERISTICS AND CONDITIONS

The 1994 population and Housing Census included housing questions for urban and rural areas, and information on housing characteristics and conditions were collected for residential and partly residential housing units. The data collected was on housing stock, the quality of the housing unit, the housing facilities and amenities, and the status of tenure and monthly rent of housing units. This information is given in detail for Amhara Region as Volume I Part IV of the Statistical Report and presented as Table 6.1 through 6.24. However, in this report, the housing characteristics of Amhara Region appear as one chapter and show only source of drinking water, type of toilet, number of rooms and persons per room, number of households per housing unit, type of lighting and type of tenure, and are presented in Table 6.1 through 6.7

In the census a housing unit is defined as a separate and independent place of abode either intended for habitation or not intended for habitation but was occupied as a living quarter by a household at the time of the census. A housing unit may at the time of the census be occupied by one or more households or may be used partly for living and partly for establishment. Different housing questions were employed in the rural and urban parts of Amhara Region. The data on housing collected in the urban areas was relatively very detailed (Appendix II) while those collected in the rural areas was of limited nature (Appendix III). Thus, during the presentation of the results, some tables refer to urban areas only, while some others may refer to both urban and rural areas. A few tables refer to rural areas only.

In the census a room was defined as a space enclosed by walls reaching from the floor to the ceiling or roof at least to a height of two meters and having an area of at least four square meters (i.e. a size large enough to hold a bed for an adult). Except for

bath rooms, toilets and passage ways other rooms found in the housing unit were considered as rooms.

In this chapter data on the status of tenure and monthly rent of housing units is also presented. Tenure refers to the arrangements under which the household occupied its living quarters. A housing unit is said to be owner occupied if it is owned by the occupant household and it is free from rent. A housing unit is considered as rented if the household living in it pays rent to kebele office or to Agency for the Administration of Rented Housing or to the private individuals or to other organizations. There are also housing units occupied by households paying difference in rent. These are households that own another housing unit elsewhere that is rented for a lesser rent compared to the rent of the housing unit the household is occupying.

CHAPTER VII
POPULATION PROJECTION

Population projection gives information on the size, structure and characteristics of the population in the future. The resulting projected population figures can be used for drawing development plans and for policy making. This chapter provides the projected population size of Amhara region by rural-urban, sex, and five years age group for period from 1995-2000.

Methodology:

There are two main categories of methods for population projection: (a) procedures for projecting the population considering mortality, fertility and migration by age and sex (cohort component method); and (b) procedures for projecting the population using mathematical functions. The former technique is usually applicable to a longer time period projection under different variants, i.e., low, medium and high variants. In this report, a simple mathematical function (exponential) is used to project the population up to the year 2000.

The population projection is made separately for rural and urban areas by applying the national estimated annual average growth rates for rural and urban areas (2.23 percent for rural and 4.11 percent for urban areas). The projected population size of rural and urban areas were made using an exponent method of projection. The projected population size of rural and urban areas were split into males and females by applying and keeping constant the sex ratios of rural and urban population of Amhara region obtained in the 1994 census. Then, the projected population of urban and rural areas by sex were added up to give the total projected population size of Amhara region.

Assessment of age structure of the population:

Information on age of the population collected in the census is often subjected to age mis-reporting. This is because some people, do not know their true age and others do not report their age accurately. The indices and graphs of the age structure of the population have indicated that, there is some distortion of the

reported age pattern of the population. This distortion on the reported age pattern of the population may be caused by age misreporting and migration. Despite some distortion on the age pattern, the reported age structure of the rural-urban population of Amhara region obtained from the 1994 census were used as a base year population. The reported age structure of the rural, urban areas of Amhara region obtained from the 1994 census are given on Table 7.1.

Assumptions:

The projection presented in this chapter is made under the assumption that the annual average population growth rates of rural and urban areas for the nation observed between 1984-1994 which are 2.23 percent and 4.11 percent, respectively will remain constant during the projection period. Then, these observed growth rates are applied for projecting the rural and urban population of Amhara region for each year between 1995-2000. The reported age distribution obtained in rural and urban areas during 1994 are assumed to remain constant up to the year 2000. The assumption that age distribution will remain constant may not hold because changes in fertility and mortality will have an effect on age distribution. This assumptions may be revised when detailed population projections are made in the forthcoming census analytical report of the region.

Projection Results:

Based on the above assumptions, the projected population results of Amhara region and rural-urban breakdowns by sex, five years age group up to the year 2000 is given in Table 7.2. Figures in the tables refer to mid-year population i.e., July first of the indicated years.

This projection is made for a limited number of years and under very broad assumptions. This was made to provide figures that will be useful for institutions or individuals who would like to use the projected figures, till detailed projections under various assumptions and for longer periods can be made. These detailed projections will be presented in the census analytical report of the region that will be forthcoming.

VOLUME I: PART I

CHAPTER II - POPULATION SIZE AND CHARACTERISTICS

TABLE 2.1 Total population of zones and weredas by sex, urban and rural: 1994

TABLE 2.2 Total population of towns by sex: 1994

TABLE 2.3A Population size by broad age group, sex and type of residence (Amhara Region-total): 1994

TABLE 2.3B Population size by broad age group, sex and type of residence (Amhara Region-urban): 1994

TABLE 2.3C Population size by broad age group, sex and type of residence (Amhara Region-rural): 1994

TABLE 2.4 Population size of zones by sex and type of residence, urban and rural: 1994

TABLE 2.5 Household size and average number of persons per household in conventional households by zones, urban and rural: 1994

TABLE 2.6 Population size by sex and age in single year, urban and rural: 1994

TABLE 2.7 Population size of weredas by sex and age group, urban and rural: 1994

TABLE 2.8 Population size of towns by sex and age group: 1994

TABLE 2.9 Population size by ethnic group and sex, urban and rural: 1994

TABLE 2.10 Five major ethnic groups of weredas by sex, urban and rural: 1994

TABLE 2.11 Five major ethnic groups of towns by sex: 1994

TABLE 2.12 Population size by mother tongue and sex, urban and rural: 1994

TABLE 2.13 Five major mother tongues of weredas by sex, urban and rural: 1994

TABLE 2.14 Five major mother tongues of towns by sex: 1994

TABLE 2.15 Population size by second language spoken and sex, urban and rural: 1994

TABLE 2.16A Population size by religion, sex and age group (Amhara Region-total): 1994

TABLE 2.16B Population size by religion, sex and age group (Amhara Region-urban): 1994

TABLE 2.16C Population size by religion, sex and age group (Amhara Region-rural): 1994

TABLE 2.17 Population size of weredas by religion and sex, urban and rural: 1994

TABLE 2.18 Population size of towns by religion and sex: 1994

TABLE 2.19A Population in conventional households by relationship to head of household, sex and age group (Amhara Region-total): 1994

TABLE 2.19B Population in conventional households by relationship to head of household, sex and age group (Amhara Region-urban):1994

TABLE 2.19C Population in conventional households by relationship to head of household, sex and age group (Amhara Region-rural):1994

TABLE 2.20A Population aged ten years and over by marital status, sex and age group (Amhara Region-total): 1994

TABLE 2.20B Population aged ten years and over by marital status, sex and age group (Amhara Region-urban): 1994

TABLE 2.20C Population aged ten years and over by marital status, sex and age group (Amhara Region-rural): 1994

TABLE 2.21 Population by broad age groups, disability status, type of disability and sex ratio: 1994

TABLE 2.22 Population by disability status and type of disability, urban and rural: 1994

ANNEX I - POPULATION PROJECTIONS

ANNEX TABLE I.1 Reported population size of Amhara Region by urban and rural, five years age group and sex October, 1994 census

ANNEX TABLE I.2 Population projection of Amhara Region by rural-urban, five years age group and sex, 1995 - 2000

ANNEX II - POPULATION SIZE OF KEBELES

ANNEX TABLE II.1 Total population of kebeles by sex, urban areas: 1994

ANNEX TABLE II.2 Total population of farmers' associations by sex, rural areas: 1994

VOLUME I: PART II

CHAPTER III - EDUCATIONAL CHARACTERISTICS

TABLE 3.1A Population aged five years and over by status of school attendance, age and sex (Amhara Region-total): 1994

TABLE 3.1B Population aged five years and over by status of school attendance, age and sex (Amhara Region-urban): 1994

TABLE 3.1C Population aged five years and over by status of school attendance, age and sex (Amhara Region-rural): 1994

TABLE 3.2 Population of zones aged five years and over by status of school attendance, sex, urban and rural: 1994

TABLE 3.3A Population aged five years and over currently attending school by level, age and sex (Amhara Region-total): 1994

TABLE 3.3B Population aged five years and over currently attending school by level, age and sex (Amhara Region-urban): 1994

TABLE 3.3C Population aged five years and over currently attending school by level, age and sex (Amhara Region-rural): 1994

TABLE 3.4 Population of zones aged five years and over currently attending school by level, sex, urban and rural: 1994

TABLE 3.5 Gross and net enrolment ratios in primary, junior and senior secondary school for weredas: 1994

TABLE 3.6A Population aged ten years and over by literacy status, highest grade completed and sex (Amhara Region-total): 1994

TABLE 3.6B Population aged ten years and over by literacy status, highest grade completed and sex (Amhara Region-urban): 1994

TABLE 3.6C Population aged ten years and over by literacy status, highest grade completed and sex (Amhara Region-rural): 1994

TABLE 3.7 Population of weredas aged ten years and over by literacy status, highest grade completed (grouped), percent literate, sex, urban and rural: 1994

TABLE 3.8 Population of towns aged ten years and over by literacy status, highest grade completed (grouped), percent literate and sex: 1994

CHAPTER IV - ECONOMIC ACTIVITY STATUS

TABLE 4.1A Population aged ten years and over by age group, sex, activity status and rate (Amhara Region-total): 1994

TABLE 4.1B Population aged ten years and over by age group, sex, activity status and rate (Amhara Region-urban): 1994

TABLE 4.1C Population aged ten years and over by age group, sex, activity status and rate (Amhara Region-rural): 1994

TABLE 4.2 Population of zones aged ten years and over by sex, activity status and rate, urban and rural: 1994

TABLE 4.3 Population of towns aged ten years and over by sex, activity status and rate: 1994

TABLE 4.4A Economically non-active population aged ten years and over by age group, sex and reason for not working (Amhara Region-total): 1994

TABLE 4.4B Economically non-active population aged ten years and over by age group, sex and reason for not working (Amhara Region-urban): 1994

TABLE 4.4C Economically non-active population aged ten years and over by age group, sex and reason for not working (Amhara Region-rural): 1994

TABLE 4.5A Unemployed population aged ten years and over by sex and age group (Amhara Region -total): 1994

TABLE 4.5B Unemployed population aged ten years and over by sex and age group (Amhara Region -urban): 1994

TABLE 4.5C Unemployed population aged ten years and over by sex and age group (Amhara Region -rural): 1994

TABLE 4.6 Unemployed population of zones aged ten years and over by sex, urban and rural): 1994

TABLE 4.7 Unemployed population of towns aged ten years and over by sex: 1994

TABLE 4.8A Unemployed population aged ten years and over by age group, sex and educational level (Amhara Region-total): 1994

TABLE 4.8B Unemployed population aged ten years and over by age group, sex and educational level (Amhara Region-urban): 1994

TABLE 4.8C Unemployed population aged ten years and over by age group, sex and educational level (Amhara Region-rural): 1994

TABLE 4.9A Economically active population aged ten years and over by age group, sex and employment status (Amhara Region-total): 1994

TABLE 4.9B Economically active population aged ten years and over by age group, sex and employment status (Amhara Region-urban): 1994

TABLE 4.9C Economically active population aged ten years and over by age group, sex and employment status (Amhara Region-rural): 1994

TABLE 4.10A Economically active population aged ten years and over by age group, sex and major occupational groups (Amhara Region-total): 1994

TABLE 4.10B Economically active population aged ten years and over by age group, sex and major occupational groups (Amhara Region-urban): 1994

TABLE 4.10C Economically active population aged ten years and over by age group, sex and major occupational groups (Amhara Region-rural): 1994

TABLE 4.11 Economically active population aged ten years and over by sex and minor occupational groups (Amhara Region-total): 1994

TABLE 4.12A Economically active population aged ten years and over by age group, sex and major industrial divisions (Amhara Region-total): 1994

TABLE 4.12B Economically active population aged ten years and over by age group, sex and major industrial divisions (Amhara Region-urban): 1994

TABLE 4.12C Economically active population aged ten years and over by age group, sex and major industrial divisions (Amhara Region-rural): 1994

TABLE 4.13 Economically active population aged ten years and over by sex and minor industrial groups (Amhara Region-total): 1994

TABLE 4.14 Employed population of zones in urban areas aged ten years and over by sex and number of days worked: 1994

ANNEX I - SUMMARY OF POPULATION SIZES

ANNEX TABLE 1 Total population size of zones and weredas by sex, urban and rural: 1994

ANNEX TABLE 2 Total population of towns by sex: 1994

ANNEX TABLE 3 Population size by sex and age in single year, rban and rural: 1994

ANNEX TABLE 4 Population projection of Amhara Region by urban-rural, five years age group and sex, 1995 - 2000

VOLUME I: PART III

CHAPTER V - MIGRATION, FERTILITY AND MORTALITY

A - MIGRATION

TABLE 5.1A Population by age group, sex, migration status and area of previous residence (Amhara Region-total): 1994

TABLE 5.1B Population by age group, sex, migration status and area of previous residence (Amhara Region-urban): 1994

TABLE 5.1C Population by age group, sex, migration status and area of previous residence (Amhara Region-rural): 1994

TABLE 5.2A Population of zones by sex, migration status and area of previous residence, urban and rural: 1994

TABLE 5.2B Population of towns by sex, migration status and area of previous residence (Amhara Region):1944

TABLE 5.3A Migrant population by age group, sex and length of residence (Amhara Region-total): 1994

TABLE 5.3B Migrant population by age group, sex and length of residence (Amhara Region-urban): 1994

TABLE 5.3C Migrant population by age group, sex and length of residence (Amhara Region-rural): 1994

TABLE 5.4A Migrant population of zones by sex and length of residence, urban and rural):1994

TABLE 5.4B Migrant population of towns by sex and length of residence (Amhara Region): 1994

B - FERTILITY

TABLE 5.5A Summary measures of fertility based on reported data for zones, (Amhara Region: 1994

TABLE 5.5B Summary measures of fertility based on reported data for towns that have 10,000 and above persons, Amhara: 1994

TABLE 5.6A Women of child bearing age by age group, number of children born alive during the last twelve months, age specific fertility rate and total fertility rate, urban and rural: 1994

TABLE 5.6B Women of child bearing age by age group, number of children born alive during the last twelve months, age specific fertility rate and total fertility rate for major urban centers (with 10,000 or more inhabitants): 1994

TABLE 5.7 Women aged 10 years and over by age group, number of children everborn and mean number of children ever born: 1994

C- MORTALITY

TABLE 5.8A Estimated infant and child mortality rates derived by Trussell method and implied by the west Coale and Demeny model Life Table for zones, Amhara Region: 1994

TABLE 5.8B Estimated infant and child mortality rates derived by Trussell method and implied by the west Coale and Demeny model Life Table for towns with population size of 10,000 and above persons, Amhara Region: 1994

TABLE 5.9A Women aged 10 years and over by age group, number of children ever born, number of children surviving and mean number of children ever born: 1994

TABLE 5.9B Women aged 10 years and over by age group, number of children ever born, number of children surviving and mean number of children ever born for major urban centers(with 10,000 and over population): 1994

ANNEX I - SUMMARY OF POPULATION SIZES

ANNEX TABLE 1 Total population of zones and weredas by sex, urban and rural: 1994

ANNEX TABLE 2 Total population of towns by sex: 1994

ANNEX TABLE 3 Population size by sex and age in single year, urban and rural: 1994

ANNEX TABLE 4 Population projection of Amhara Region by urban and rural, five years age group and sex, 1995 - 2000

VOLUME I: PART IV

CHAPTER VI - HOUSING CHARACTERISTICS AND CONDITIONS

TABLE 6.1 Housing units of towns by type of building: 1994

TABLE 6.2 Housing units of towns by type of construction: 1994

TABLE 6.3 Housing units of zones and weredas by construction material of wall, urban and rural: 1994

TABLE 6.4 Housing units of zones and weredas by construction material of roof, urban and rural: 1994

TABLE 6.5 Housing units of towns by construction material of floor: 1994

TABLE 6.6 Housing units of towns by construction material of ceiling: 1994

TABLE 6.7 Housing units of zones and weredas by number of rooms and persons per room, urban and rural: 1994

TABLE 6.8 Housing units of weredas by whether livestock spend the night in the room where persons also spend the night in rural areas :1994

TABLE 6.9 Housing units of towns by total number of persons per housing unit: 1994

TABLE 6.10 Housing units of towns by number of households per housing unit: 1994

TABLE 6.11 Housing units of zones and weredas by source of drinking water, urban and rural: 1994

TABLE 6.12 Housing units of towns by source of drinking water 1994

TABLE 6.13 Housing units of zones and weredas by availability of toilet facility, urban and rural: 1994

TABLE 6.14 Housing units of towns by type of toilet facility: 1994

SECTION 4 - DETAILED INFORMATION ON HOUSING UNIT

39. WILL HOUSING UNIT INFORMATION TO BE COLLECTED ?

1= YES 2= NO

40. WHAT IS THE TOTAL NUMBER OF HOUSEHOLDS LIVING IN THE HOUSING UNIT ?

41. WHAT IS THE TOTAL NUMBER OF MEMBERS OF HOUSEHOLD OR HOUSEHOLDS IN THE HOUSING UNIT ?

MALE	FEMALE	TOTAL

42. WHAT IS THE TYPE OF HOUSING UNIT ?

1- PERMANENET
2= IMPROVISED
3= MOBILE
4= OTHER/SPECIFY/_____

43. WHAT IS THE TYPE OF BUILDING IN WHICH THE HOUSING UNIT IS FOUND?

0= NON-STOREYED DETACHED
1= NON-STOREYED 2 UNITS ATTACHED
2= NON-STOREYED 3-5 UNITS ATTACHED
3= NON-STOREYED 6 OR MORE UNITS ATTACHED
4= ONE OR MORE STOREYED DETACHED
5= ONE OR MORE STOREYED,2-3 UNITS ATTACHED
6= ONE OR MORE STOREYED, 4-6 UNITS ATTACHED
7= ONE OR MORE STOREYED,7-10 UNITS ATTACHED
8= ONE OR MORE STOREYED, 11 OR MORE UNITS ATTACHED

44. HOW MANY YEARS AGO WAS THE HOUSING UNIT BUILT ?

1= LESS THAN FIVE YEARS
2= 5-9 YEARS
3= 10-14 YEARS
4= 15-19 YEARS
5= 20 YEARS OR MORE

45. WHAT IS THE MAJOR MATERIAL USED FOR THE CONSTRUCTION OF THE WALL OF THE HOUSING UNIT ?

1= WOOD AND MUD
2= WOOD AND THATCH
3= STONE AND MUD
4= STONE AND CEMENT
5= BLOCKETS
6= BRICKS
7= REED/BAMBOO
8= OTHER/SPECIFY/_____

46. WHAT IS THE MATERIAL USED FOR THE CONSTRUCTION OF THE MAJOR PART OF THE ROOF OF THE HOUSING UNIT ?

1= CORRUGATED IRON SHEET
2= CONCRETE OR CEMENT
3= THATCH
4= WOOD AND MUD
5= BAMBOO OR REED
6= OTHER/SPECIFY/_____

47. WHAT IS THE MATERIAL USED FOR THE CONSTRUCTION OF THE MAJOR PART OF THE CEILING OF THE HOUSING UNIT ?

1= NONE
2= FABRICS
3= CHIPWOOD/HARD BOARD
4= WOODEN
5= CONCRETE
6= OTHER/SPECIFY/_____

48. WHAT IS THE MAJOR MATERIAL USED FOR THE CONSTRUCTION OF THE FLOOR OF THE HOUSING UNIT ?

1= MUD
2= WOOD TILES
3= CEMENT/CONCRETE FINISH
4= PLASTIC TILES
5= CEMENT BRICK TILE
6= BAMBOO OR REED
7= OTHER/SPECIFY/_____

49. HOW MANY ROOMS ARE THERE IN THE HOUSING UNIT?

_____

50. WHAT IS THE TYPE OF TENURE OF THE HOUSING UNIT ?

1= OWNER OCCUPIED
2= RENTED FROM KEBELE
3= RENTED FROM PUBLIC HOUSING AGENCY
4= RENTED FROM OTHER ORGANIZATION
5= PAYING DIFFERENCE IN RENT
6= RENTED FROM PRIVATE HOUSEHOLD
7= RENT FREE

51. IF RENTED, WHAT IS THE MONTHLY AMOUNT OF RENT IN BIRR ?

_____

52. WHAT IS THE MAIN SOURCE OF DRINKING WATER FOR THE MEMBERS OF THIS HOUSING UNIT ?

1= TAP INSIDE THE HOUSE
2= TAP IN COMPOUND, PRIVATE
3= TAP IN COMPOUND, SHARED
4= TAP OUTSIDE COMPOUND/ FROM PRIVATE TAP, PUBLIC TAP, OTHER ORGANIZATION, BOUGHT OR FREE OF CHARGE/
5= PROTECTED WELL OR SPRING
6= UNPROTECTED WELL OR SPRING
7= RIVER, LAKE/POND

53. WHAT TYPE OF KITCHEN DOES THE HOUSING UNIT HAVE?

1= NO KITCHEN
2= MODERN KITCHEN PRIVET
3= MODERN KITCHEN SHARED
4= TRADITIONAL KITCHEN PRIVATE
5= TRADITIONAL KITCHEN SHARED

54. WHAT TYPE OF FUEL IS MOSTLY USED FOR COOKING IN THE HOUSING UNIT ?

01= USES NO FUEL
02= ELECTRICITY
03= GAS
04= KEROSINE
05= CHARCOAL
06= FIREWOOD/LEAVES SAWDUST
07= DUNG/MANURE
08= FIREWOOD AND CHARCOAL
09= FIREWOOD AND DUNG
10= FIREWOOD AND KEROSINE
11= FIREWOOD AND GAS
12 =ELECTRICITY AND KEROSINE
13 =ELECTRICITY AND FIREWOOD
14 =ELECTRICITY AND CHARCOAL
15= ELECTRICITY AND GAS
16= OTHER/SPECIFY/_____

55. WHAT TYPE OF BATHING FACILITY DOES THE HOUSING UNIT HAVE ?

1= NONE
2= BATHTUB PRIVATE
3= BATHTUB SHARED
4= SHOWER PRIVATE
5= SHOWER SHARED
6= OTHER/SPECIFY/_____

56. WHAT TYPE OF TOILET FACILITY DOES THE HOUSING UNIT HAVE ?

1= NONE
2= FLUSH TOILET, PRIVATE
3= FLUSH TOILET, SHARED
4= PIT, PRIVATE
5= PIT, SHARED

57. WHAT TYPE OF LIGHTING HAS THE HOUSING UNIT ?

1= ELECTRICITY (METER PRIVATE)
2= ELECTRICITY (METER SHARED)
3= LANTERN
4= KEROSINE
5= OTHER/SPECIFY/____

58. IS THERE A RADIO IN THIS HOUSING UNIT ?

1= YES
2= NO

59. IS THERE A TELEPHONE IN THIS HOSING UNIT ?

1= YES
2= NO

60. IS THERE A TELEVISION SET IN THIS HOUSING UNIT ?

1= YES
2= NO
